# What is this product?

Eastspring Investments – Japan Dynamic Fund is a sub-fund of Eastspring Investments which is an open-ended investment company registered in Luxembourg. Its home regulator is Commission de Surveillance du Secteur Financier ("CSSF"), Luxembourg.

# **Objective and Investment Strategy**

### **Objective and Strategy**

This Sub-Fund aims to generate long-term capital growth through a concentrated (i.e. focused) portfolio of equities, equity-related securities, bonds, and currencies. The Sub-Fund will invest primarily in securities of companies, which are incorporated, listed in or have their area of primary activity in Japan.

The Sub-Fund may also invest in depository receipts including ADRs and GDRs, convertible bonds, preference shares, warrants and fixed income securities issued by Japan entities.

The Investment Manager screens a wide investment universe to form a concentrated portfolio of Japanese companies that are typically trading on low valuations relative to their history and the market by applying a disciplined and rigorous fundamental analysis during the selection process to ensure a high level of conviction around the valuation for each of the companies held in the Sub-Fund.

The Sub-Fund will only invest in fixed income/debt securities and currencies on an ancillary basis (i.e. not more than 33% of its net assets) and will not invest more than 10% of its net assets in fixed income/debt securities with no credit rating or with a credit rating below investment grade. The Sub-Fund will also not invest more than 10% of its net assets in fixed income/debt securities issued by or guaranteed by any single sovereign issuer with a credit rating below investment grade. For the avoidance of doubt, a "single sovereign issuer" shall include a country, its government, a public or local authority of that country. The Sub-Fund will only invest in currencies such as spot currencies and deposits for cash management purpose i.e. in the base currency and currencies of the share classes offered by the Sub-Fund.

The Sub-Fund may use up to 25% of its net assets for securities lending transactions. The Sub-Fund may use financial derivative instruments ("**FDIs**") for hedging and efficient portfolio management purposes.

#### Benchmark

This Sub-Fund aims to outperform the return of MSCI Japan Index ("Benchmark"). The Sub-Fund is actively managed. The Benchmark has been selected because it is representative of the investment universe of the Sub-Fund and it is therefore an appropriate performance comparator. The majority of the Sub-Fund's equity securities will not necessarily be components of, or have weightings derived from the Benchmark. The Investment Manager may use its discretion to overweight or underweight certain components of the Benchmark and may invest in companies or sectors not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Sub-Fund will materially deviate from the Benchmark.

## Use of derivatives/investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of the Sub-Fund's Net Asset Value.

### What are the key risks?

Investment involves risks. Please refer to the Hong Kong Summary Prospectus for details including the risk factors.

#### 1. General Investment Risk

 The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. You may not get back your original investment. Past performance is not a guide to future performance. The level of investment return is not fixed and will vary.

#### 2. Equity Market Risk

• The Sub-Fund's investment in equity securities and equity-related securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.

#### 3. Country Specific Risk

- As the Sub-Fund invests in a single country i.e. Japan, the value of the Sub-Fund may be more susceptible to the market, currency, economic, political, policy, liquidity, tax, legal or regulatory event affecting the economy of that country.
- The concentration of the Sub-Fund's investments in a single country may result in greater volatility than portfolios which comprise broad-based global investments.

### 4. Currency and Exchange Rates Risk

 The assets that the Sub-Fund invests in may be denominated in currencies different from the Sub-Fund's base currency and the currency of the shares held by you. Also, a share class may be designated in a currency other than the base currency of the Sub-Fund. The net asset value of the Sub-Fund may be affected unfavourably by adverse movements in foreign currency exchange rates between the currencies of the underlying assets and the base currency of the Sub-Fund and the currency of the shares held by you, as well as by changes in exchange rate controls.

#### 5. Liquidity Risk

• The Sub-Fund may have investments which have liquidity risks (for example, low trading volumes), and may incur substantial losses if it is unable to sell these investments at opportune times or prices.

#### 6. Hedged Share Class Risk

• If the shares of a share class can be subscribed and redeemed in a currency other than the base currency of the Sub-Fund, a fluctuation in exchange rates could affect the value of an investment performance and therefore substantially impact the performance of such share class.

• The hedging strategy is to reduce but not eliminate currency risk. If these hedging transactions are imperfect or are only placed over a portion of the foreign exchange exposure, such share class will bear the resulting benefit or loss.

#### 7. Derivatives Risk

- Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, counterparty risk, liquidity risk, volatility risk, operational risk, leverage risk, valuation risk and over-the-counter transaction risk.
- The Sub-Fund may use FDIs for hedging and efficient portfolio management purposes, however, the Sub-Fund's use of derivatives may become ineffective in such endeavours and the Sub-Fund may suffer significant losses.

## How has the Sub-Fund performed?

Note:

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividend reinvested (if applicable).
- These figures show by how much Class A increased or decreased in value during the calendar year being shown.
- Performance data has been calculated in USD, including taking into account charges and excluding subscription fee and redemption fee you might have to pay.
- Sub-Fund launch date: 2006
- Class A launch date: 2011
- The Management Company views Class A, being the retail share class offered and available for sale in Hong Kong, as the most appropriate representative share class.

# Is there any guarantee?

This Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

## What are the fees and charges?

### Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund.

Fee	What you pay
Subscription fee	Maximum 5% of the initial subscription price or applicable net asset value per share
Switching fee	Nil (You should note that an individual distributor may charge a switching fee, which is subject to such distributor's discretion.)
Redemption fee	Nil

# Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the Sub-Fund's net asset value)
Management fee	Current and maximum 1.50%
Operating and Servicing Expenses (payable to the Management Company)	Current 0.25%; maximum 0.30%
Depositary fee (related to safekeeping of assets)	Included in the Operating and Servicing Expenses
Performance fee	N/A
Administration fee	Included in the Operating and Servicing Expenses

## Other fees

You may have to pay other fees when dealing in the shares of the Sub-Fund

## **Additional Information**

- You generally buy and redeem shares at the Sub-Fund's next-determined net asset value (NAV) after an authorised distributor receives your request in good order prior to its internal cut-off time, and then forwards your request to the Central Administration Agent of the SICAV prior to 2:00 p.m. (Luxembourg time) being the dealing cut-off time of the Central Administration Agent on each valuation day. However, before placing your subscription or redemption orders, please check with your distributor for the Sub-Fund's valuation day and the distributor's internal dealing cut-off time (which may be earlier than the Central Administration Agent's dealing cut-off time). You may also check with the Hong Kong Representative regarding the Sub-Fund's valuation day.
- The net asset value of this Sub-Fund is calculated and the price of shares published each business day on <u>www.eastspring.com.hk</u>.
- You may obtain the past performance information of other share classes offered to Hong Kong investors from <u>www.eastspring.com.hk</u>.
- The website (www.eastspring.com.hk) has not been reviewed by the SFC.
