NAV/ unit	: 10,387 VND
Price per unit	: 9,200 VND
Return 2013 YTD	: 10.5%

INVESTMENT OBJECTIVE

Investment objective is to generate regular income stream with potential growth of capital for investors.

The strategy is to invest in a balanced portfolio, comprising of fixed income instruments (medium to long term bonds) and public equities of companies operating in Vietnam in high potential industry sectors.

FUND MANAGER'S COMMENTARY

Equity Market

The VN-Index has slightly increased 3.5% Mar 2013, after declining 1.1% in Feb 2013, closing the month at 491. Market liquidity was dried with the average daily trading value on the HOSE during Mar 2013 of US\$40.7mn. Foreign investors had a net buy position of US\$ 56mn value of equity. In short term, investment sentiment of investors is driven by the measures recently issued by the government to solve some key macro factors.

Fixed Income Market

In March 2013, the bond transactions remained strong in both primary and secondary markets. Over the month, bond yields for all tenors fell 20bps - 40bps while the volume was almost double. We expect the bond market continue to be active in the coming months as banks will be still in stuck with credit growth and CPI will not pick up yet.
