A member of Prudential plc (UK)

- The Fund invests in bonds and is subject to interest rate fluctuation and exposed to credit default, valuation and credit rating risks as well as credit risk of the counterparties with which it trades. Investment grade bonds are subject to the risks of credit rating downgrades.
- The Fund invests mainly in the Eurozone, and may be subject to greater volatility compared to more diversified funds. Investments in Eurozone may be subject to risk related to those countries, such as sovereign debt risks and, in adverse event, credit downgrade of a sovereign or exit of EU members from the Eurozone.
- The Fund may incur substantial losses if it is unable to sell those investments with high liquidity risks at opportune times or prices.
- The Fund may invest in asset backed, mortgage backed and commercial mortgage backed securities, all of which have limited recourse to the issuers. These securities are also generally illiquid and subject to market, credit and interest rate risks.
- The Fund may use financial derivatives instruments (FDIs) extensively for hedging and efficient portfolio management purposes whilst FDIs will not be extensively used for investment purposes. Using FDIs may expose the Fund to market risk, management risk, credit risk, counterparty risk, liquidity risk, volatility risk, operational risk, leverage risk, valuation risk and over-the-counter transaction risk. The use of such instruments may be ineffective and the Fund may incur significant losses.
- The Fund's Board of Directors may, at its discretion, pay dividends out of capital or gross income while charging all or part of the fees and expenses to the Fund's capital, resulting in higher distributable income. Thus, the Fund may effectively pay dividends out of capital. Payment of dividends out of capital (effectively or not) amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment, which may result in an immediate reduction of the net asset value per share.
- Investment involves risk. Investors should not rely solely on this document in making investment decision. Past performance information presented is not indicative of future performance.

INVESTMENT OBJECTIVE

The Fund invests in a diversified portfolio consisting primarily of quality bonds and other fixed income/debt securities denominated in Euros and other European currencies. The Fund aims to maximize total returns through investing in fixed income/debt securities (including up to 15% of its net assets in CMBS, MBS and ABS) rated BBB- and above. The Fund may continue to hold securities that are downgraded below the minimum indicated rating after purchase but may not make additional purchases of such securities.

Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the Board of Directors, and can be made out of (a) income; or (b) net capital gains; or (c) capital of the Fund or a combination of any of (a) and/or (b) and/or (c). The payment of distributions should not be confused with the Fund's performance, rate of return or yield. Any payment of distributions by the Fund may result in an immediate decrease in the net asset value per share. Funds with Monthly and Quarterly Distribution Frequency: Annualised Dividend yield = (Dividend per share / Reference NAV at start of distribution period) x (No. of calendar days in a year / No. of calendar days in distribution period) x 100%. Funds with Yearly Distribution Frequency: Annualised Dividend Yield = (Dividend amount / Total Net Assets) x (No. of calendar days in a year / No. of calendar days in distribution period) x 100%. "N.A.": This share class does not distribute dividends. For details of other fees and charges, please refer to the offering document.
