

Eastspring Investments – Global Market Navigator Fund (the "Fund")

- Eastspring Investments - Global Market Navigator Fund is referred to as the 'Fund'.
- The Fund invests in equities and is exposed to the risk of market price fluctuations.
- The Fund invests in fixed income/debt securities and is subject to interest rate fluctuation and exposed to credit default, valuation and credit rating risks as well as credit risk of the counterparties with which it trades and sovereign debt risk. Pertaining to investments in high yield/unrated/non-investment grade /non-investment grade sovereign fixed income/debt securities, these securities may be subject to higher credit risks and liquidity risks, compared with investment grade fixed income/debt securities, with an increased risk of loss of investments. Investment grade fixed income/debt securities are subject to the risks of credit rating downgrades.
- The Fund may use financial derivatives instruments (FDIs) for hedging and efficient portfolio management purposes. Using FDIs may expose the Fund to market risk, management risk, credit risk, counterparty risk, liquidity risk, volatility risk, operational risk, leverage risk, valuation risk and over-the-counter transaction risk. The use of such instruments may be ineffective and the Fund may incur significant losses.
- The Fund's investment in emerging markets subject it to greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- Investments in the Eurozone may be subject to risk related to those countries, such as sovereign debt risks and, in adverse event, credit downgrade of a sovereign or exit of EU members from the Eurozone.
- The Fund may incur substantial losses if it is unable to sell those investments with liquidity risks at opportune times or prices.
- The Fund may invest in bonds and equities denominated in currencies other than the Fund's base currency and may be exposed to currency and exchange rates risk.
- The Fund's Board of Directors may, at its discretion, pay dividends out of capital or gross income while charging all or part of the fees and expenses to the Fund's capital, resulting in higher distributable income. Thus, the Fund may effectively pay dividends out of capital. Payment of dividends out of capital (effectively or not) amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment, which may result in an immediate reduction of the net asset value per share.
- Investment involves risk. Investors should not rely solely on this document in making investment decision. Past performance information presented is not indicative of future performance.

Investment objective

The Fund aims to achieve positive absolute returns over the medium-term through the implementation of an actively managed investment strategy in a diversified range of global assets including cash, equities, bonds and currencies. Exposure to each of the asset classes will be primarily through exchange traded funds, index futures, direct equity and bonds (including high yield bonds, CMBS, ABS and MBS), swaps, options and foreign exchange forwards, each of which may be traded through recognised exchanges or via the over-the-counter markets. The Fund may also invest up to 10% in aggregate of its net assets in Alternative Asset Classes. This objective may also be achieved through investments in unlisted collective investment schemes and other sub-funds of the SICAV on an ancillary basis below 30% of the net assets of the Fund. Underlying funds, other than sub-funds of the SICAV, may charge management fees of up to 1.00% per annum of their net assets. No management fee will be charged by other sub-funds of the SICAV.

Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the Board of Directors, and can be made out of (a) income; or (b) net capital gains; or (c) capital of the Fund or a combination of any of (a) and/or (b) and/or (c). The payment of distributions should not be confused with the Fund's performance, rate of return or yield. Any payment of distributions by the Fund will result in an immediate reduction in the net asset value per share. Funds with Monthly and Quarterly Distribution Frequency: Annualised Dividend rate = (Dividend per share / NAV per share of previous ex-dividend date) x (No. of calendar days in a year / No. of calendar days in distribution period) x 100%. Annualised Dividend Rate is calculated based on the dividend distribution for the relevant distribution period and does not refer to the dividend yield for the preceding 12 months, and it may be higher or lower than the actual annual dividend yield. "N.A.": This share class does not distribute dividends. For details of other fees and charges, please refer to the offering document.
