

Eastspring Investments – US High Yield Bond Fund (the "Fund")

- Eastspring Investments - US High Yield Bond Fund is referred to as the 'Fund'.
- The Fund invests in fixed income/debt securities and is subject to interest rate fluctuation and exposed to credit default, valuation and credit rating risks as well as credit risk of the counterparties with which it trades. Pertaining to investments in high yield/unrated/non-investment grade fixed income/debt securities, these securities may be subject to higher credit risks and liquidity risks, compared with investment grade fixed income/debt securities, with an increased risk of loss of investments. Investment grade fixed income/debt securities are subject to the risks of credit rating downgrades.
- The Fund invests in a single country, and may be subject to greater volatility compared to more diversified funds.
- The Fund may incur substantial losses if it is unable to sell those investments with liquidity risks at opportune times or prices.
- The Fund may offer currency hedged share classes which involve currency hedging transactions that may, in extreme cases, adversely affect the Fund's net asset value.
- The Fund may invest in asset backed, mortgage backed and commercial mortgage backed securities, all of which have limited recourse to the issuers. These securities are also generally illiquid and subject to market, credit and interest rate risks.
- The Fund may use financial derivatives instruments (FDIs) for hedging and efficient portfolio management purposes. Using FDIs may expose the Fund to market risk, management risk, credit risk, counterparty risk, liquidity risk, volatility risk, operational risk, leverage risks, valuation risk and over-the-counter transaction risk. The use of such instruments may be ineffective and the Fund may incur significant losses.
- The Fund's Board of Directors may, at its discretion, pay dividends out of capital or gross income while charging all or part of the fees and expenses to the Fund's capital, resulting in higher distributable income. Thus, the Fund may effectively pay dividends out of capital. Payment of dividends out of capital (effectively or not) amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment, which will result in an immediate reduction of the net asset value per share.
- Investment involves risk. Investors should not rely solely on this document in making investment decision. Past performance information presented is not indicative of future performance.

Distributions are not guaranteed and may fluctuate. Past distributions are not necessarily indicative of future trends, which may be lower. Distribution payouts and its frequency are determined by the Board of Directors, and can be made out of (a) income; or (b) net capital gains; or (c) capital of the Fund or a combination of any of (a) and/or (b) and/or (c). The payment of distributions should not be confused with the Fund's performance, rate of return or yield. Any payment of distributions by the Fund will result in an immediate reduction in the net asset value per share. Funds with Monthly and Quarterly Distribution Frequency: Annualised Dividend rate = (Dividend per share / NAV per share of previous ex-dividend date) x (No. of calendar days in a year / No. of calendar days in distribution period) x 100%. Annualised Dividend Rate is calculated based on the dividend distribution for the relevant distribution period and does not refer to the dividend yield for the preceding 12 months, and it may be higher or lower than the actual annual dividend yield. "N.A.": This share class does not distribute dividends. For details of other fees and charges, please refer to the offering document.
