▪ The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you. **Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. There are other risks materially relevant to the PRIIP which are not included in the summary risk indicator. For more information, please refer to the prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Disclosure:

(p.a.): per annum. Source: Eastspring Investments (Singapore) Limited. Returns are based in share class currency and computed on NAV-NAV basis with net income reinvested, if any. Since inception returns for periods less than a year are not annualised. The benchmark for the hedged share classes, if any, is also calculated on a hedged basis. Benchmark is for information purposes only unless specifically referenced in the Investment Objective. Wef July 2018, the monthly fund and benchmark returns calculated are aligned to the last NAV date of the fund for the month. Returns may increase or decrease as a result of currency fluctuations. **Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product.**

Benchmark: This Sub-Fund aims to outperform the return of JP Morgan Asia Credit Non-Investment Grade Index ("Benchmark"). The Sub-Fund is actively managed. The Benchmark has been selected because it is representative of the investment universe of the Sub-Fund and it is therefore an appropriate performance comparator. The majority of the Sub-Fund's exposure to bonds will not necessarily refer to, nor have weightings derived from the Benchmark. The Investment Manager may use its discretion to invest in bonds not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Sub-Fund will moderately deviate from the Benchmark.
