Source: Eastspring Investments (Singapore) Limited. Past performances is not a guide to future performance and should not be the sole factor of consideration when selecting a product. For full details, please refer to the performance disclosure.

Summary risk indicator (SRI) (Class C)

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you. **Be aware of currency risk.** You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. There are other risks materially relevant to the PRIIP which are not included in the summary risk indicator. For more information, please refer to the prospectus. This product does not include any protection from future market performance so you could lose some or all of your investment.
