### **FUND INFORMATION**

### Name of Fund

Eastspring Investments Bond Fund (the "Fund")

### Fund Category/ Type

Bond/income

### **Fund Objective**

The Fund seeks to provide investors with a steady stream of income\* returns by investing principally\*\* in a portfolio of investment grade fixed income securities with exposure in noninvestment grade fixed income securities which yield above average returns.

## ANY MATERIAL CHANGES TO THE FUND'S OBJECTIVE WOULD REQUIRE UNIT HOLDERS' APPROVAL.

- Income distributed to a Unit Holder will be reinvested into additional Units unless Unit Holder opts for the distribution to be paid out.
- \*\* principally refers to minimum 70% of the Fund's NAV

### Performance Benchmark

The performance benchmark of the Fund is Quant Shop Malaysian Government Securities Medium Index ("Quant Shop MGS Medium Index").

Source: www.quantshop.com

**Note**: The risk profile of the Fund is different from the risk profile of the performance benchmark.

### Fund Income Distribution Policy

At least once a year, subject to the availability of income.

(1.07)

3 84

7 17

4 05

### Bases of calculation and assumptions made in calculating returns:

0.73

Annual total return

Percentage growth =  $\frac{NAV_t}{NAV_0}$ -1

NAVt = NAV at the end of the period

NAV<sub>0</sub> = NAV at the beginning of the period

Performance annualised =  $(1 + \text{Percentage Growth})^{1/n} - 1$ Adjusted for unit split and distribution paid out for the period = Number of years

Past performance is not necessarily indicative of future performance and unit prices and investment returns may go down, as well as up.

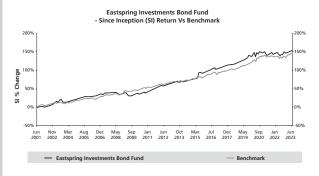

### MANAGER'S REPORT

### **Fund Performance**

Over the 5-year period, the Fund recorded a return of 17.14%, underperforming the benchmark return of 21.56% by 4.42%.

During the period under review, the Fund registered a return of 2.99%, underperforming the benchmark return of 3.01% by 0.02%.

For the period under review, the Fund's underperformance was attributable to the Fund's overweight position in short tenor corporate bonds that underperformed the medium-term government bond index.

The performance is calculated on NAV-to-NAV basis with gross income or dividend reinvested.

**Benchmark:** Quant Shop Malaysian Government Securities Medium Index ("Quant Shop MGS Medium Index").

**Source:** Lipper for Investment Management and www.quantshop.com, as at 30 June 2023.

Past performance of the Fund is not necessarily indicative of its future performance.

### MANAGER'S REPORT (CONTINUED)

### Analysis of Fund Performance

For the financial period ended 30 June 2023:

Income Return	Capital Return*	Total Return	Total Return of Benchmark
(%)	(%)	(%)	(%)
0.00	2.99	2.99	3.01

<sup>\*</sup> Capital return components (NAV per unit to NAV per unit).

### Distribution/ Unit Split

No distribution or unit split were declared for the financial period ended 30 June 2023.

### Investment Strategy During the Period Under Review

The Fund participated in selected quality bond issuances for yield pick-up, and traded on market volatility, subject to liquidity constraints

### MANAGER'S REPORT (CONTINUED)

### **Asset Allocation**

Asset Allocation	30-Jun 2023	31-Dec 2022	Changes
	(%)	(%)	(%)
Unquoted fixed income securities Cash and other assets	92.82 7.18	73.47 26.53	19.35 (19.35)

### Asset Allocation as at 30 June 2023

The significant changes in asset allocation of the Fund for the period under review was due to the Fund's purchase of corporate bonds and outflows from the fund.

## State of Affairs of the Fund

There have been neither significant change to the state of affairs of the Fund nor any circumstances that materially affect any interests of the unit holders during the period under review.

### MARKET REVIEW

The Federal Reserve ("Fed") raised its federal funds rate by 75 bps during the review period to 5.00%-5.25% as inflationary pressures persist and it remains committed to tame inflation to its 2% target. However, in its June Federal Open Market Committee ("FOMC") meeting, the Fed left the federal funds rate unchanged but signaled that another 50bps rate hike is expected in 2023. The "hawkish pause" is to allow the FOMC to assess additional information and its implications of its monetary policy.

Also, the period saw banking turmoil hitting U.S. banks, with Silicon Valley Bank ("SVB") failing after a bank run in mid-March, marking the second largest bank failure by asset size in U.S. history. The collapse of SVB was due to the significant withdrawals from its technology and start-up depositors, as well as its over-exposure to investments that had suffered huge mark-to-market losses. Subsequently, Signature Bank was shut down, while First Republic Bank was "bailed out" by 11 banks with a total of USD30bn injection.

The U.S. Personal Consumption Expenditures ("PCE") price index for May eased to 3.8% YoY, from the revised 4.3% recorded in April. U.S. Core PCE declined marginally to 4.6% compared to 4.7% in April. Although U.S. non-farm payrolls grew by 339,000 in May 2023, above April's upwardly-revised data of 294,000, May's unemployment rate rose to 3.7% (April : 3.4%). US inflation (as measured by CPI) declined to 0.1% (month-onmonth) in May, easing from a 0.4% increase in April amid a continued decline in the cost of energy. This brought down the annual rate to 4.0%, below expectations of 4.1%. The economy more broadly remains in good health. The US unemployment rate increased in May to 3.7% from 3.4%, a larger than expected move but the labour market nonetheless remains historically tight.

Meanwhile, the tightening cycle continued with Bank of England ("BOE") surprising markets with a higher-than-expected rate hike of 50bps to 5.00% to get U.K. inflation back down to the 2% target as it remained at 8.7% in May. At it recent meeting, the European Central Bank ("ECB") raised its interest rates on the main refinancing operations, marginal lending facility and the deposit facility by 25bps each to 4.00%, 4.25% and 3.50% respectively. The Eurozone's Consumer Price Index ("CPI") eased to 5.5% in June 2023 compared to 6.1% in the previous month but Core CPI inched up to 5.4% from 5.3% in May. The Eurozone's composite PMI declined to 50.3 in June (May revised: 52.8) as both Services and Manufacturing PMI continued to decline to 52.4 and 43.6 respectively (May revised: 55.1; 44.8). Reserve Bank of Australia ("RBA") decided to increase the cash rates by another 25bps to 4.10% in June and in its minutes noted that "core inflation had remained sticky and shown little sign of easing".

In Malaysia, after staying pat for two consecutive Monetary Policy Committee ("MPC") meetings, BNM surprisingly decided to hike the Overnight Policy Rate ("OPR") by 25 bps from 2.75% to 3.00% in its May MPC Meeting. BNM expects growth in 2023 to be led by domestic demand while exports are expected to moderate. Risks to the domestic growth outlook are weighed to be relatively balanced, with upside risks to growth potentially coming from better-than-expected tourism activity and projects implementation, while downside risks may arise from slower-than-expected global growth and volatile global financial markets.

BNM forecasts that headline and core inflation rate will moderate in 2023, averaging between 2.8-3.8%. However, the central bank is of the view that the balance of risk for inflation is tilted to the upside. Given that BNM views domestic growth to be resilient, the central bank believes that it is timely to "further normalise the degree of monetary accommodation" and withdraw the monetary stimulus provided to support economic recovery during the Covid-19 pandemic, to prevent future financial imbalances. The monetary policy stance is currently viewed as "slightly accommodative" and remains supportive of the economy.

Malaysia's CPI and core CPI continued to retreat to 2.8% and 3.5% respectively in May, compared to April's figure of 3.3% and 3.6% respectively. BNM's international reserves decreased to US\$113.0bn as of mid-June (mid-May: US\$114.7bn). The reserves position is sufficient to finance 4.8 months of imports and is 1.0x of the total short-term external debt.

Prime Minister Anwar Ibrahim re-tabled an expansionary Budget 2023 entitled "Developing Malaysia MADANI" focused on the economy, institutional reform and social justice. The total allocation is revised upward to RM386.1 billion versus RM372.3 billion tabled by the previous government in October 2022. 2023 GDP is expected to grow at 4.5%, while inflation is expected to range between 2.8%-3.8% in 2023, which is wider than the 2.8-3.3% in the October 2022 budget. In line with the government's commitment to fiscal consolidation, the fiscal deficit is expected to be at a lower 5.0% of GDP and forecasted to narrow to 3.2% of GDP by 2025. The government ended the speculation of the implementation of Goods & Services Tax ("GST"), but introduced instead a Luxury Goods Tax in 2023, although there are no details yet on the value and type of goods to be taxed, nor the tax rate. Capital Gains Tax on the disposal of unlisted shares is planned for implementation in 2024.

Malaysia's MGS yield curve traded mixed and flatter during the period with 3-, 5-, 10- and 15-year yields closed at 3.49%, 3.62%, 3.88% and 4.03%, respectively. The flatter yield curve was driven monetary policy tightening both globally and domestically on the back of still commendable economic recovery and heightening inflationary pressure. MGII yields too ended the same across the curve with the 3-, 5-, 10- and 15-year MGII close at 3.47%, 3.70%, 3.89% and 3.98% respectively.

### REBATES AND SOFT COMMISSIONS

During the period under review, the Manager and its delegates (if any) did not receive any soft commissions from stockbrokers.

### SECURITIES LENDING OR REPURCHASE TRANSACTIONS

No securities lending or repurchase transaction have been carried out during the financial period under review.

The accompanying summary of significant accounting policies and notes to the unaudited financial statements form an integral part of these unaudited financial statements.

# SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE SIX MONTHS FINANCIAL PERIOD ENDED 30 JUNE 2023

The following accounting policies have been used in dealing with items which are considered material in relation to the financial statements.

#### A. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with the Malaysian Financial Reporting Standards ("MFRS") and International Financial Reporting Standards ("IFRS"). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with the MFRS and IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported financial period. It also requires the Manager to exercise their judgement in the process of applying the Fund's accounting policies. Although these estimates and judgement are based on the Manager's best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note I.

a. Standards, amendments and interpretations that have been issued but not yet effective and have not been early adopted:

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2023 and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Fund.

### B. INCOME RECOGNITION

Interest income from deposits placed with licensed financial institutions is recognised on an accrual basis using the effective interest rate method.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets, the effective interest rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Interest income from unquoted fixed income securities including amortisation of premium and accretion of discount are recognised using the effective interest rate method.

Realised gain or loss on disposal of unquoted fixed income securities is accounted for as the difference between the net disposal proceeds and the carrying amount of the investments, which is determined on cost adjusted for accretion of discount and amortisation of premium.

#### C. TAXATION

Current tax expense is determined according to the Malaysian tax laws at the current rate based upon the taxable income earned during the financial period.

#### D. FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is the Fund's functional and presentation currency.

### E. FINANCIAL ASSETS AND FINANCIAL LIABILITIES

### Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Fund's debt securities are solely principal and interest, however, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments are measured at fair value through profit or loss.

The Fund classifies cash and cash equivalents and amount due from Manager as financial assets at amortised cost as these financial assets are held to collect contractual cash flows consisting of the amount outstanding.

The Fund classifies accrued management fee, amount due to Manager, amount due to Trustee, amount due to brokers and other payables and accruals as financial liabilities measured at amortised cost.

### ii. Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade date, the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Gains or losses arising from changes in the fair value of the "financial assets at fair value through profit or loss" category are presented in the statement of comprehensive income within "net gain/(loss) on financial assets at fair value through profit or loss" in the financial period in which they arise. Any unrealised gains however are not distributable.

Deposits with licensed financial institutions are stated at cost plus accrued interest calculated on the effective interest method over the period from the date of placement to the date of maturity of the respective deposits.

Unquoted fixed income securities are carried at cost and adjusted for any amortisation of premium or accretion of discount from acquisition date to maturity date. The carrying cost is revalued to reflect its fair value on a daily basis based on fair value prices quoted by a bond pricing agency ("BPA") registered with the Securities Commission ("SC") as per the SC Guidelines on Unit Trust Funds. Where such quotations are not available or where the Manager is of the view that the price quoted by the BPA for a specific unquoted fixed income securities differs from the market price by more than 20 basis points, the Manager may use the market price, provided that the Manager:

- (i) records its basis for using a non-BPA price;
- (ii) obtains necessary internal approvals to use the non-BPA price; and
- (iii) keeps an audit trail of all decisions and basis for adopting the market yield.

Financial assets and other financial liabilities are subsequently carried at amortised cost using the effective interest rate method.

### iii. Impairment for assets carried at amortised costs

The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. Management considers both historical analysis and forward looking information in determining any expected credit loss. Management considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 months expected credit losses as any such impairment would be wholly insignificant to the Fund.

### iv. Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

### v. Definition of default and credit-impaired financial assets

Any contractual payment which is more than 90 days past due is considered credit impaired.

#### vi Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount. The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in impairment gains. There are no write-offs/recoveries during the financial period.

### F. CASH AND CASH EQUIVALENTS

For the purpose of the statement of cash flows, cash and cash equivalents comprise bank balances and deposits with licensed financial institutions that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

### G. UNIT HOLDERS' CAPITAL

The unit holders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 "Financial Instruments: Presentation". Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's net asset value;
- the units are the most subordinated class and class features are identical;
- there are no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unit holder exercises the right to put the unit back to the Fund.

Units are created and cancelled at prices based on the Fund's net asset value per unit at the time of creation or cancellation. The Fund's net asset value per unit is calculated by dividing the net assets attributable to unit holders with the total number of outstanding units.

### H. AMOUNT DUE FROM/(TO) BROKERS

Amount due from and to brokers represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively. The amount due from brokers balance is held for collection.

These amounts are recognised initially at fair value and subsequently measured at amortised cost. At each reporting date, the Fund shall measure the loss allowance on amount due from broker at an amount equal to the lifetime expected credit losses if the credit risk has increased significantly since initial recognition. If, at the reporting date, the credit risk has not increased significantly since initial recognition, the Fund shall measure the loss allowance at an amount equal to 12 months expected credit losses. Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required.

If the credit risk increases to the point that it is considered to be credit impaired, interest income will be calculated based on the gross carrying amount adjusted for the loss allowance. A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

Any contractual payment which is more than 90 days past due is considered credit impaired.

### I. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information contents on the estimates, certain key variables that are anticipated to have material impacts to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgements are continually evaluated by the Manager and the Trustee and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the SC's Guidelines on Unit Trust Funds.

# NOTES TO THE UNAUDITED FINANCIAL STATEMENTS FOR THE SIX MONTHS FINANCIAL PERIOD ENDED 30 JUNE 2023

#### 1. INFORMATION ON THE FUND

Eastspring Investments Bond Fund (the "Fund") was constituted pursuant to the execution of Master Deed dated 4 May 2001, Supplemental Master Deed dated 26 May 2003, Supplemental Master Deed dated 15 February 2006, Master Supplemental Deed dated 25 July 2007 and Second Supplemental Master Deed dated 30 November 2009 between BHLB (Malaysia) Trustee Berhad ("BHLB Trustee") and Eastspring Investments Berhad (the "Manager"). The Fund replaced BHLB Trustee with Deutsche Trustees Malaysia Berhad (the "Trustee") effective 1 October 2010. A Supplemental Master Deed was entered into between the Manager and the Trustee on 30 July 2010 to effect the change of trustee from BHLB Trustee to the Trustee, followed by Second Supplemental Master Deed dated 28 January 2011, Third Supplemental Master Deed dated 9 March 2011, Fourth Supplemental Master Deed dated 20 January 2012, Fifth Supplemental Master Deed dated 26 March 2014, Sixth Supplemental Master Deed dated 2 January 2015, Seventh Supplemental Master Deed dated 11 July 2016, Eighth Supplemental Master Deed dated 25 January 2017, Ninth Supplemental Master Deed dated 11 December 2017, Tenth Supplemental Master Deed dated 4 June 2018, Eleventh Supplemental Master Deed dated 30 September 2021, Twelfth Supplemental Master Deed dated 29 June 2022 and Thirteenth Supplemental Master Deed dated 29 November 2022 (collectively referred to as the "Deeds").

The Fund was launched on 29 May 2001 and will continue its operations until terminated as provided under Part 12 of the Deed.

The Fund seeks to provide investors with a steady stream of income returns by investing principally in a portfolio of investment-grade fixed income securities with exposure in non-investment grade fixed income securities which yield above average returns.

All investments will be subjected to the Securities Commission's ("SC") Guidelines on Unit Trust Funds, the Deeds and the Fund's objective.

The Manager is a company incorporated in Malaysia and is related to Prudential Plc., a public listed company in the United Kingdom. The principal activity of the Manager is the establishment and management of unit trust funds and asset management.

### 2. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Fund is exposed to a variety of risks, which include market risk (inclusive of price risk and interest rate risk), liquidity risk, credit/default risk, fund management risk, non-compliance risk and capital risk.

Financial risk management is carried out through internal control processes adopted by the Manager and adherence to the investment restrictions as stipulated in the Deeds.

Financial instruments of the Fund are as follows:

	Note	Financial assets at amortised cost	Financial assets at fair value through profit or loss	Total
		RM	RM	RM
2023 Cash and cash equivalents Unquoted fixed income securities Amount due from Manager	7 6	18,513,264 - 2,182,697 20,695,961	255,925,827 - 255,925,827	18,513,264 255,925,827 2,182,697 276,621,788
2022 Cash and cash equivalents Unquoted fixed income securities Amount due from Manager	7 6	33,458,623 - 187,286 33,645,909	230,168,566 - 230,168,566	33,458,623 230,168,566 187,286 263,814,475

All liabilities are financial liabilities which are carried at amortised cost.

#### Market risk

### i. Price risk

Price risk is the risk that the fair value of the investment in unquoted fixed income securities will fluctuate because of changes in market prices (other than those arising from interest rate risk). The value of investments may fluctuate according to the activities of individual companies, sector and overall political and economic conditions. Such fluctuation may cause the Fund's net asset value and prices of units to fall as well as rise, and income produced by the Fund may also fluctuate.

The price risk is managed through diversification and asset allocation whereby the unquoted fixed income securities exposure will be reduced in the event of anticipated market weakness.

The table below shows assets of the Fund as at 30 June which are exposed to price risk:

	2023	2022
	RM	RM
Financial assets at fair value through profit or loss: Unquoted fixed income securities*	255,925,827	230,168,566

<sup>\*</sup> Includes interest receivables of RM2,648,504 (2022: RM2,377,371).

The table below summarises the sensitivity of the Fund's profit/(loss) after tax and net asset value to movements in valuation of unquoted fixed income securities at the end of each reporting financial period. The analysis is based on the assumptions that the valuation of the unquoted fixed income securities increased and decreased by 5% with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the unquoted fixed income securities, having regard to the historical volatility of the prices.

% Change in price	Market value RM	Impact on profit/ (loss) after tax and net asset value RM
2023 +5% -5%	265,941,189 240,613,457	12,663,866 (12,663,866)
<u>2022</u> +5% -5%	239,180,755 216,401,635	11,389,560 (11,389,560)

#### ii Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate due to changes in market interest rates.

In general, when interest rates rise, unquoted fixed income securities prices will tend to fall and vice versa. Therefore, the net asset value of the Fund may also tend to fall when interest rates rise or are expected to rise. However, investors should be aware that should the Fund holds an unquoted fixed income securities till maturity, such price fluctuations would dissipate as it approaches maturity, and thus the growth of the net asset value shall not be affected at maturity. In order to mitigate interest rates exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured assets depending on the view of the future interest rate trend of the Manager, which is based on its continuous fundamental research and analysis.

Investors should note that the movement in prices of unquoted fixed income securities and money market instruments are benchmarked against interest rates. As such, the investments are exposed to the movement of the interest rates.

This risk is crucial since unquoted fixed income securities portfolio management depends on forecasting interest rate movements. Prices of unquoted fixed income securities move inversely to interest rate movements, therefore as interest rates rise, the prices of unquoted fixed income securities decrease and vice versa. Furthermore, unquoted fixed income securities with longer maturity and lower yield coupon rates are more susceptible to interest rate movements.

Such investments may be subject to unanticipated rise in interest rates which may impair the ability of the issuers to make payments of interest income and principal, especially if the issuers are highly leveraged. An increase in interest rates may therefore increase the potential for default by an issuer.

The table below summarises the sensitivity of the Fund's profit/(loss) after tax and net asset value to movements in interest rate for investments at the end of each reporting financial period as a result of movement in interest rate. The analysis is based on the assumptions that the interest rate changed by 1% (2022: 1%) with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the interest rate, having regard to the historical volatility of the interest rate.

	2023	2022
% Change in interest rate of unquoted fixed income securities	Impact on profit after tax and net asset value	Impact on loss after tax and net asset value
	RM	RM
+1% (2022: +1%) -1% (2022: -1%)	(636,286) 638,516	(712,645) 716,118

The Fund's investments in deposits with licensed financial institutions are short term in nature. Therefore, exposure to interest rate fluctuations is minimal.

### Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting its financial obligations. Generally, all investments are subject to a certain degree of liquidity risk depending on the nature of the investment instruments, market, sector and other factors. For the purpose of the Fund, the Manager will attempt to balance the entire portfolio by investing in a mix of assets with satisfactory trading volume and those that occasionally could encounter poor liquidity. This is expected to reduce the risks for the entire portfolio without limiting the Fund's growth potentials.

The Fund maintains sufficient level of liquid assets, after consultation with the Trustee. to meet anticipated payments and cancellations of units by unit holders. Liquid assets comprise bank balances, deposits with licensed financial institutions and other instruments which are capable of being converted into cash within 7 days.

The table below summarises the Fund's financial liabilities into relevant maturity groupings based on the remaining period as at the statement of financial position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

	Less than 1 month	Between 1 month to 1 year	Total
	RM	RM	RM
2023 Accrued management fee Amount due to Manager Amount due to Trustee Other payables and accruals Contractual undiscounted cash outflows	232,361 655,969 18,589 - 906,919	18,266 18,266	232,361 655,969 18,589 18,266
2022 Accrued management fee Amount due to Manager Amount due to Trustee Amount due to brokers Other payables and accruals Contractual undiscounted cash outflows	212,656 280,859 17,013 9,434,022 - 9,944,550	- - - 24,088	212,656 280,859 17,013 9,434,022 24,088 9,968,638

### Credit/Default risk

Credit risk refers to the ability of an issuer or a counter party to make timely payments of interest income, principals and proceeds from realisation of investments. In the case of the Fund, the Manager regularly reviews the ratings assigned to the Issuer so that the necessary steps can be taken if the ratings fall below those prescribed by the Deeds.

The credit risk arising from placements of deposits with licensed financial institutions is managed by ensuring that the Fund will only place deposits in reputable licensed financial institutions. The settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the SC's Guidelines on Unit Trust Funds.

The following table sets out the credit risk concentrations and counterparties of the Fund.

	Financial assets at fair value through profit or loss	Cash and cash equivalents	Amount due from Manager	Total

None of these financial assets are past due or impaired.

### Fund management risk

There is the risk that the management company may not adhere to the investment mandate of the respective Funds. With close monitoring by the investment committee, back office system being incorporated with limits and controls, and regular reporting to the senior management team, the management company is able to manage such risk. The Trustee have an oversight function over management of the Fund by the management company to safeguard the interests of unit holders.

## Non-compliance risk

Non-compliance risk arises when the Manager and others associated with the Fund are not compliant to the rules set out in the Fund's constitution or the laws that govern the Fund or applicable internal control procedures, or acts of fraudulence or dishonesty.

Non-compliance may expose the Fund to higher risks which may result in a fall in the value of the Fund which in turn may affect its investment goals. However, the risk can be mitigated by the internal controls and compliance monitoring undertaken by the Manager.

## Capital risk

The capital of the Fund is represented by equity consisting of unit holders' capital of RM224,311,343 (2022: RM212,690,327) and retained earnings of RM51,385,260 (2022: RM41,155,510). The amount of equity can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

#### Fair value estimation

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price).

The fair value of financial assets traded in active market (such as trading securities) are based on quoted market prices at the close of trading on the financial period end date. The Fund utilises the last traded market price for financial assets where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is representative of the fair value.

An active market is a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

## i. Fair value hierarchy

The following table analyses financial instruments carried at fair value by valuation method.

The different levels have been defined as follows:

- Level 1: Quoted prices (unadjusted) in active market for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are
  observable for the asset or liability, either directly (that is, as prices) or
  indirectly (that is, derived from prices).
- Level 3: Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Fund. The Fund considers observable data to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market

The following table analyses within the fair value hierarchy of the Fund's financial assets (by class) measured at fair value:

	Level 1	Level 2	Level 3	Total
	RM	RM	RM	RM
2023 Financial assets at fair value through profit or loss: Unquoted fixed income securities		255,925,827	-	255,925,827
2022 Financial assets at fair value through profit or loss: Unquoted fixed income securities		230,168,566	-	230,168,566

Financial instruments that trade in markets that are considered to be active but are valued based on guoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2 which include unquoted fixed income securities. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information. The Fund's policies on valuation of these financial assets are stated in Note E to the financial statements.

ii. The carrying value of cash and cash equivalents, amount due from Manager and all liabilities are a reasonable approximation of their fair values due to their short term nature

#### 3. MANAGEMENT FEE

In accordance with the Deed, the Manager is entitled to a management fee at a rate not exceeding 2.00% per annum of the net asset value of the Fund calculated on daily basis.

For the financial period ended 30 June 2023, the management fee is recognised at a rate of 1.00% (2022: 1.00%) per annum on the net asset value of the Fund, calculated on daily basis.

There will be no further liability to the Manager in respect of the management fee other than the amounts recognised above.

#### 4. TRUSTEE FEE

In accordance with the Deed, the Trustee is entitled to an annual fee at a rate not exceeding 0.20% per annum of the net asset value of the Fund, subject to a minimum fee of RM30,000 per annum.

For the financial period ended 30 June 2023, the Trustee fee is recognised at a rate of 0.08% (2022: 0.08%) per annum on the net asset value of the Fund, inclusive of local custodian fee, calculated on daily basis.

There will be no further liability to the Trustee in respect of the trustee fee other than the amounts recognised above.

### 5. TAXATION

	6-months financial period ended 30.6.2023	6-months financial period ended 30.6.2022
	RM	RM
Tax charged for the financial period: Current taxation	_	_

The numerical reconciliation between profit/(loss) before taxation multiplied by the Malaysian statutory tax rate and tax expense of the Fund is as follows:

	C th	C th

All dealers highlighted above are not related to the Manager. There are no brokerage fees charged by the dealers for the financial period ended 30 June 2023 and 30 June 2022.

## 10. TOTAL EXPENSE RATIO ("TER")

	2023	2022
	%	%
TER	0.54	0.54

TER is derived from the following calculation:

$$TER = \frac{(A+B+C+D+E)}{F} \times 100$$

A = Management fee

B = Trustee fee

C = Audit fee

D = Tax agent fee

E = Other expenses

F = Average net asset value of the Fund calculated on a daily basis

The average net asset value of the Fund for the financial period calculated on a daily basis is RM298,757,515 (2022: RM276,378,879).

## 11. PORTFOLIO TURNOVER RATIO ("PTR")

	2023	2022
PTR (times)	0.09	0.49

PTR is derived from the following calculation:

(Total acquisitions for the financial period + total disposals for the financial period)  $\div$  2 Average net asset value of the Fund for the financial period calculated on a daily basis

#### where:

total acquisitions for the financial period = RM42,611,500 (2022: RM136,075,900) total disposals for the financial period = RM9,375,400 (2022: RM134,396,321)

### 12. UNITS HELD BY THE MANAGER AND PARTIES RELATED TO THE MANAGER
