LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
④	④	③	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The Fund decreased by 2.33% in Apr 2025, underperformed the benchmark's -1.11%. The fund's underperformance was due to selected overweight holdings in financials (Hong Kong, Malaysia, Indonesia), technology (Hong Kong, Korea and Taiwan) and industrials (Singapore and China). In April, MXAPJ saw a steep drop early in the month post US Liberation Day where US President Trump announced sweeping tariffs which included a baseline 10% tariff on imports from all countries, with higher rates for specific nations. However, recovery took place as policy was gradually walked back, starting with the 90-day implementation delay on 9th April. India staged a recovery during the month as RBI provided liquidity from the second interest rate cut and ongoing cash injections as well as falling oil prices. There was also foreign inflow into the India market on the back of fading US exceptionalism as well as growing optimism on India's domestic demand and its ability to withstand global trade tensions. HK/ China on the other hand underperformed its peers being in the eye of the tariff storm. Domestically, demand remained weak and there were fears that the retaliation tariffs could pose further significant drag on China's export sectors. Asean saw continued foreign selling in April with the highest in Indonesia, followed by Thailand, Malaysia and Philippines. On FX, the US dollar continued to weaken with the dollar index declined by 4.6% to 99.5.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 30 April 2025, the Volatility Factor (VF) for this Fund is 14.2 and is classified as "High" (Source: Lipper). "High" generally includes funds with VF that are higher than 11.98 but not more than 16.345. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
