LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	③	⑤	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Malaysian equity markets corrected in March as foreign outflows continued, the 6th consecutive month of net foreign outflow since Oct 2024, we have had foreign investors selling net RM17.7b. YTD 2025 foreign investors have sold RM10b in equities so far. Investor sentiment was overall weak for the month given the ongoing policy announcements by US President Trump, the rhetoric on retaliatory tariffs, and the devastating 7.7 earthquake that hit Myanmar, but the effects were felt as far out as Bangkok Thailand. During the month Bank Negara released their annual report for 2024, keeping to their GDP forecast of 4.5-5.5% for 2025. Global growth forecast was at 2.8-3.3% with potential headwinds from severe trade restrictions, escalation in geopolitical conflicts and tighter financial conditions.

The KLCI closed the month at 1,513.65, down 3.88% mom. The FBM Small Cap index declined 2.13% for the month, outperforming the KLCI. The best performing sectors were Oil & Gas (+0.5%) and Utilities (+0.2%). The worst performing sectors were Telecommunications (-6.4%) and Finance (-4.9%). Average value traded on Bursa in March was RM2863m higher by 14% mom.
