LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	③	③	Lowest Highest
			① ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Global equities, as proxied by the MSCI ACWI Index (USD, gross), fell by -3.9% in March as U.S. equities underperformed and fell by -5.9% amid tariff uncertainty and potential retaliation, causing volatility and economic concerns. The U.S. imposed heavy tariffs on Canada, Mexico, China, and Hong Kong, causing global market volatility and concerns over inflation and recession. The Federal Reserve (Fed) lowered its GDP growth forecasts for this year and the next two years, while raising personal consumption expenditures (PCE) inflation forecasts for 2025 and 2026. The Fed kept rates steady despite trade tensions and a slower growth outlook. Annual inflation rates in the U.S. and Europe slowed to 2.8% and 2.3% respectively in February, due to slower price growth for services and energy.

European equities returned -0.2% in USD terms, outperforming global equities and developed markets equities (proxied by MSCI World), driven by U.S. trade policy updates and strong German business confidence. The Asia ex-Japan (AxJ) region delivered a 0.1% USD return during the month, with Taiwan and Australia being the underperformers. Chinese equities, proxied by the MSCI China Index (USD, gross) returned 2.0% and outperformed global markets on stimulus hopes. Indian stocks performed well, supported by foreign fund inflows and strong domestic economic data. Emerging markets returned 0.7%, outperforming developed markets in March, with Brazil, India, and China leading the performance.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 31 March 2025, the Volatility Factor (VF) for this Fund is 14.6 and is classified as "High" (Source: Lipper). "High" generally includes funds with VF that are higher than 12.075 but not more than 16.46. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

Investors are advised to read and understand the contents of the Eastspring Investments Global Equity Fund ("Fund") Prospectus dated 25 November 2021, the Fund's First Supplementary Prospectus dated 15 July 2022, the Fund's Second Supplementary Prospectus dated 2 February 2024, the Fund's Third Supplementary Prospectus dated 17 March 2025 (collectively, "the Prospectuses") and the Fund's Product Highlights Sheet ("PHS") before investing.
