LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
①	①	①	Lowest Highest
			① ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

March 2025 was characterised by rising geopolitical tension and economic concerns but fixed income markets delivered mixed returns. The JP Morgan Asia Credit Non-Investment Grade Index ended the month with a gain of 0.37%. The US Federal Reserve kept interest rates at 4.25%-4.50% at the March FOMC meeting. Chairman Jerome Powell expressed concerns about high inflation and slower economic growth. In the US, inflation is approaching the central bank's 2% target level but remains elevated. The annual rate of inflation narrowed to 2.8% in February, driven primarily by energy prices. Meanwhile, the US unemployment rate rose to 4.1% in February, which was higher than expected. Surveys of households and businesses showed a rise in uncertainty about the economic outlook.

US Treasury yields moved in a narrow range over the month. The 10-year US Treasury yield climbed by 4 basis points to 4.25%, while the 2-year note yield declined by 8 basis points to 3.91%. The US dollar continued to depreciate against most major developed country currencies. Asian high yield bonds rallied on the back of positive Treasury returns. High yield corporate bonds and high yield quasi-sovereign bonds gained 0.63% and 0.41% respectively. Across markets, Hong Kong and Maldives delivered the highest returns. Across sectors, real estate and transport were the best performing sectors. In China, new home sales from the top 100 developers rose 1.2% YoY to CNY 188 billion in February. The government is considering to grant local governments more autonomy in the purchase of unsold apartments to help stabilise sentiment in the real estate market.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 31 March 2025, the Volatility Factor (VF) for this Fund is 15.1 and is classified as "High" (Source: Lipper). "High" generally includes funds with VF that are higher than 12.075 but not more than 16.46. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
