TEMPORARY DEFENSIVE POSITIONS

If and when the Manager considers the market, economic, political or other conditions to be adverse to the Fund, the Manager may take temporary defensive position to respond to those conditions. In such circumstances, the Fund may temporarily increase its holdings in money market instruments and/or deposit by more than the allocated percentage of the Fund's asset allocation.

RISK MANAGEMENT STRATEGIES

The risk management strategies employed by the Manager includes the following:

- monitoring market and economic conditions;
- monitoring adherence to the Fund's objective and investment restrictions and limits;
- monitoring the performance of the Fund;
- taking temporary defensive positions, when required;
- escalating and reporting investment matters to the committee undertaking the oversight function of the Fund, senior management team, risk management committee and board of directors; and
- practising prudent liquidity management to ensure that the Fund maintains reasonable levels of liquidity to meet redemption request. Liquidity risk of the Fund will be identified, monitored and managed in order to meet the redemption requests from the Unit Holders with minimal impact to the Fund as well as safeguarding the interests of the remaining Unit Holders. It has taken into account, amongst others, the asset class of the Fund and the redemption policy of the Fund. To manage the liquidity risk, we have put in place the following procedures:
 - Regular review by the designated fund manager on the Fund's investment portfolio including its liquidity profile.
 - Monitoring of the Fund's net flows against redemption requests during normal and adverse market conditions are performed as pre-emptive measures in tracking the Fund's liquidity status to ensure there is sufficient cash holdings in addressing any liquidity concerns, which would mitigate potential risks in relation to meeting Unit Holders' redemption requests.
 - Suspension of redemption requests from the Unit Holders when the Target Fund is suspended as stipulated under Section 4 of "Suspension Policy of the Target Fund". Prior to triggering a suspension, we seek to manage this by allowing the Fund to hold up to 15% of its NAV in liquid assets which seeks to allow the Fund to have a sufficient buffer to meet the Unit Holders' redemption request. Suspension will only be triggered as a last resort and is in the best interest of Unit Holders to do so. The Manager will inform the Unit Holders in a timely and appropriate manner of the decision to suspend dealing in Units of the Fund. During the suspension period, the redemption requests from the Unit Holders will not be accepted and such redemption requests will be dealt on the next Business Day once the suspension is lifted.
 - Should the suspension of redemption request be triggered, the redemption proceeds will be paid to the Unit Holders from the Fund within five (5) Business Days upon receiving the redemption proceeds from the Target Fund as stipulated under Section 6 of "How to Redeem Units".

RISK FACTORS

General Risks of Investing in a Unit Trust Fund

Inflation risk

This risk refers to the risk that investor's investment in unit trust fund may not grow or generate income at a rate that keeps pace with inflation, thus reducing investor's purchasing power even though the investment in monetary terms may have increased.

Management company risk

The performance of a unit trust fund depends on the experience, expertise and knowledge of the management company. Should there be a lack of any of the above qualities by the management company, it may adversely affect the performance of the unit trust fund.

Market risk

Market risk refers to potential losses that may arise from adverse changes in the market conditions. Market conditions are generally, affected by, amongst others, economic and political stability. If the market which the unit trust fund invests in suffers a downturn or instability due to adverse economic or political conditions, this may adversely impact the market prices of the investments of a unit trust fund.

Specific Risks when Investing in the Fund

Collective investment scheme risk

Any adverse effect on the CIS which the Fund is investing in will impact the NAV of the Fund as the NAV of the Fund is dependent on the performance of the CIS.

Country risk

The Fund may be affected by risks specific to the country in which it invests. Such risks may be caused by but not limited to changes in the country's economic fundamentals, social and political stability, currency movements and foreign investment policies. These factors may have an impact on the prices of the Fund's investment in that country and consequently may also affect the Fund's NAV.

Currency risk

As the investments of the Fund may be denominated in a currency other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currency in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currency in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

The impact of the exchange rate movement between the base currency of the Fund and the currency of the respective Classes may result in a depreciation of Unit holder's holdings as expressed in the base currency.

The Fund may offer Units in multiple currency Classes, which will expose the Unit Holder to currency risk in respect to the currency of Units of a Class (e.g. RM denominated) against the base currency of the Fund.

The Fund will be offering a Hedged-class to reduce the currency risk of Units of the Hedged-class against the base currency of the Fund. Unit Holders should be made aware that hedging may not fully eliminate currency risk, any gains or losses arising from hedging may further increase or decrease the returns of the investment, and there may be cost involving in hedging facilities to be borne by the Hedged-class of the Fund.

Derivatives risk

The Manager may invest in derivatives for hedging purposes. Derivatives' market values may be subject to wide fluctuations and expose the Fund to potential gains and losses due to mark-to-market value. Some of the risks associated with derivatives are, but not limited to, market risk, management company risk, counterparty risk, and liquidity risk.

To the extent hedging transactions are imperfect, there is no guarantee that it will be possible to remove all currency, interest rate or credit exposures. In the event the hedging strategy does not meet its intended objective, this could have an adverse impact on the NAV of the Fund.

In the event that the counterparty of the financial derivative instrument is not able to fulfil its obligations especially in the event of its bankruptcy, this may lead to a loss to the Fund. Counterparty risk may be mitigated by conducting credit evaluation on the counterparty to ascertain the creditworthiness of the counterparty. Should there be a downgrade in the credit rating of the counterparty, we will evaluate the situation and reassess the creditworthiness of the counterparty. We will take the necessary steps in the best interest of the Fund.

Fund management of CIS risk

While the Manager will exercise due skill and care in selecting the underlying CIS, it does not have control over the management of the underlying CIS which the Fund is investing in and there is no guarantee that the investment objective of the underlying CIS will be met. This may result in the NAV of the underlying CIS to be adversely affected.

Liquidity risk

Liquidity risk in the context of this Fund is associated with the Target Fund's ability to meet the Fund's redemption request in a timely manner. If the Target Fund fails to meet the Fund's redemption request, it may jeopardise the Fund's ability to meet its own Unit Holders' request.

Related party transaction risk

The Fund may invest in CIS of the Manager or other asset management companies which are related to the Manager and may also have dealings with parties related to these companies. However, all transactions with related parties are to be executed on terms which are best available to the Fund and based on best execution and at arms-length transaction between independent parties.

Suspension of redemption request risk

The Manager may, in consultation with the Trustee and having considered the interests of Unit Holders, suspend the dealing in Units of the Fund, when the Target Fund is suspended, as stipulated under Section 4 of "Suspension Policy of the Target Fund". No application will be dealt with when the suspension of dealing of Units is triggered and this will limit the Unit Holders' right to freely redeem their Units in the Fund.

Where a suspension of dealing in Units is triggered and when the redemption application has been accepted, the Fund may defer application until the suspension is lifted.

Should the redemption request of the Fund be deferred due to total net redemption received by the Fund on a particular Business Day be more than 10% of the NAV of the Fund, redemptions may be deferred for processing. This is because the Management Company shall not be bound to redeem on any Valuation Day more than 10% of the NAV of the Target Fund on such Valuation Day. As such, this will impact the Fund's ability to pay Unit Holders in a timely manner.

As such, Unit Holders should take note that the Fund will also defer redemption when the Target Fund defers redemption exceeding 10% of the Target Fund's NAV.

The Fund will not be able to redeem the Units and will be compelled to remain invested in the Target Fund for a longer period of time. Hence, the investments will continue to be subject to the risks inherent to the Target Fund.

Prior to triggering a suspension, we seek to manage this by allowing the Fund to hold up to 15% of its NAV in liquid assets which seeks to allow the Fund to have a sufficient buffer to meet the Unit Holders' redemption request. Suspension will only be triggered as a last resort and is in the best interest of Unit Holders to do so. The Manager will inform the Unit Holders in a timely and appropriate manner of the decision to defer or suspend dealing in Units of the Fund. Should the suspension of redemption request be triggered, the redemption proceeds will be paid to the Unit Holders from the Fund within five (5) Business Days upon receiving the redemption proceeds from the Target Fund as stipulated under Section 6 of "How to Redeem Units".

SPECIFIC RISKS ASSOCIATED WITH THE TARGET FUND

Concentration risk

The Target Fund's investments may be concentrated in the Asia Pacific ex-Japan region. The value of the Target Fund may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Target Fund may also be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the relevant market or a particular sector that the Target Fund may invest into.

Derivatives risk

The Target Fund may invest in derivatives which will be subject to risks. While the judicious use of derivatives by professional investment managers can be beneficial, derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. The Target Fund may use FDIs for hedging and efficient portfolio management purpose, however, the Target Fund's use of derivatives may become ineffective in such endeavours and the Target Fund may suffer significant losses. The leverage element of a "FDI" can result in a loss significantly greater than the amount invested in the FDI by the Target Fund. Some of the risks associated with derivatives are market risk, management risk, counterparty risk, liquidity risk, operational risk and leverage risk.

Investments in derivatives may require the deposit of initial margin and additional margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, the investment may be liquidated at a loss. Therefore, it is essential that such investments in derivatives are monitored closely. The Investment Manager has the necessary controls for investments in derivatives and have in place systems to monitor the derivative positions for the Target Fund.

The Investment Manager does not intend to use derivatives transactions for speculation or leverage but may use them for efficient portfolio management and/or risk management. Investors should refer to the paragraphs below for further information on the risks associated with derivatives and the risk management and compliance procedures and controls adopted by the Investment Manager in this respect. In particular, the investment in volatility derivatives, asset backed securities and mortgage-backed securities are subject to the following risk.

- (a) **Management risk**
FDIs are highly specialised instruments that require investment techniques and risk analyses different from those associated with stocks and bonds. The use of an FDI requires an understanding not only of the underlying instrument but also of the derivative itself, without the benefit of observing the performance of the derivative under all possible market conditions.
- (b) **Counterparty risk**
The use of FDIs involves the risk that a loss may be sustained as a result of the failure of another party to the contract (usually referred to as a "counterparty") to make required payments or otherwise comply with the contract's terms. The Target Fund will be exposed to credit risk on the counterparties with which it trades particularly in relation to options, futures, contracts and other derivatives such as total return swap that are not traded on a Regulated Market. A total return swap is an agreement in which one party makes payments based on the total return of an underlying asset, which includes both the income it generates and any capital gains or losses, in exchange for payments based on an interest rate, either fixed or variable, from the other party. Such instruments are not afforded the same protection as may apply to participants trading futures or options on organised exchanges, such as the performance guarantee of an exchange clearing house. The Target Fund will be subject to the possibility of the insolvency, bankruptcy or default of a counterparty with which it trades, which could result in substantial losses to the Target Fund.
- (c) **Liquidity risk**
The Target Fund may lose money or be prevented from earning capital gains if or when particular derivatives are difficult to purchase or sell, possibly preventing the Target Fund from selling such securities at an advantageous time or price that would have been most beneficial to the Target Fund, or possibly requiring the Target Fund to dispose of other investments at unfavourable times and prices in order to satisfy its obligations.
- (d) **Lack of availability**
Because the markets for certain FDIs are relatively new and still developing, suitable FDI transactions may not be available in all circumstances for risk management or other purposes. Upon the expiration of a particular contract, the portfolio manager may wish to retain the position of the Target Fund in the FDIs by entering into a similar contract, but may be unable to do so if the counterparty to the original contract is unwilling to enter into the new contract and no other suitable counterparty can be found. There is no assurance that the Target Fund will engage in FDI transactions at any time or from time to time. The ability to use FDIs may also be limited by certain regulatory and tax considerations.
- (e) **Market and other risks**
Like most other investments, FDIs are subject to the risk that the market value of the instruments will change in a way detrimental to the interest of the Target Fund. If a portfolio manager incorrectly forecasts the values of securities, currencies or interest rates or other economic factors in using FDIs, the Target Fund might have been in a better position if it had not entered into the transaction at all. While some strategies involving FDIs can reduce the risk of loss, they can also reduce the opportunity for gain or even result in losses by offsetting favourable price movements in other investments. The Target Fund may also have to buy or sell a security at a disadvantageous time or price because the Target Fund is legally required to maintain offsetting positions or asset coverage in connection with certain FDI transactions.

Other risks in using FDIs include the risk of mispricing or improper valuation of FDIs and the inability of FDIs to correlate perfectly with underlying assets, rates and indices. Many FDIs, in particular, privately negotiated FDIs, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Target Fund. Also, the value of FDIs may not correlate perfectly, or at all, with the value of the assets, reference rates or indices they are designed to closely track. In addition, the use of FDIs may cause the Target Fund to realise higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if the Target Fund had not used such instruments.

Foreign currency/ exchange risk

As the Target Fund will invest in securities which are denominated in currencies other than the reference currencies of its class (e.g. USD), fluctuations in the exchange rates of these foreign currencies may have an impact on the income and value of the Target Fund. The Investment Manager has the discretion to and may hedge the foreign currency exposure (if any) of the Target Fund. Investors will be exposed to exchange rate risks if the Investment Manager does not hedge the foreign currency exposure (if any) of the Target Fund. Also, in the event a currency hedging strategy executed does not meet its intended objective this could have adverse impact

to the value of the Target Fund. The net asset value of the Target Fund may be affected unfavourably by adverse movements in foreign currency exchange rates between the currencies of the underlying assets and the base currency of the Target Fund and the currency of the shares held by the Fund, as well as changes in exchange rate controls.

Specific risk considerations in relation to low volatility securities

The investment strategy adopted by the Target Fund may not work and/or may not achieve a reduced level of volatility, for example, the Target Fund may not produce lower price variability as compared to the overall market under all circumstances and market conditions. In the event a reduced level of volatility is achieved by adopting the investment strategy, the Target Fund may still be precluded from fully capturing the upside in rising markets. Hence the value of the Target Fund may be adversely affected.

Low volatility stocks are seen as having a lower risk profile than the overall markets. However, a portfolio comprised of low volatility stocks may not produce investment exposure that has lower variability to changes in such stocks' price levels. Investors should note that low volatility does not necessarily mean low risk and may be subject to the risks of common stocks.

The Target Fund employs systematic models to select investments on the basis of past statistical results. There is a risk that investments selected using these models may perform differently than expected as a result of the design of the model, inputs into the model, changes from historical trends or other factors.

Volatility and liquidity risk

Securities in certain markets may be subject to higher volatility and lower liquidity compared to more developed markets. The prices of such securities may be subject to fluctuations. The bid and offer spreads of the price of such securities may be large and the Target Fund may incur significant trading costs.

The Target Fund could face liquidity risk arising from investments in securities that have low trading volumes, imposed trading restrictions or temporary suspensions from trading. Investments in securities that have high liquidity risk may reduce return or incur substantial losses to the Target Fund if the Target Fund is unable to sell these securities at opportune times or prices. Liquidity could dry up in a very short time especially during a crisis.

THE ABOVE SHOULD NOT BE CONSIDERED TO BE AN EXHAUSTIVE LIST OF THE RISKS WHICH INVESTORS SHOULD CONSIDER BEFORE INVESTING INTO THE FUND. INVESTORS SHOULD BE AWARE THAT AN INVESTMENT IN THE FUND MAY BE EXPOSED TO OTHER RISKS FROM TIME TO TIME. INVESTORS SHOULD CONSULT A PROFESSIONAL ADVISER FOR A BETTER UNDERSTANDING OF THE RISKS.

BASES OF VALUATION FOR THE FUND

The bases of valuation of the respective asset classes of the Fund are as follows:

CIS

Investments in CIS which are quoted on an exchange will be valued each day based on the closing market price. However, if a valuation based on market price does not represent the fair value of the CIS, for example during abnormal market conditions or no market price is available, including in the event of a suspension in the quotation of the said CIS for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, then the said CIS should be valued at fair value, as determined in good faith by the Manager based on the methods or bases approved by the Trustee after appropriate technical consultation.

Investments in unlisted CIS will be valued each day based on the last published repurchase price.

Money market instruments

Money market instruments will be valued each day based on the price quoted by a bond pricing agency registered with the SC.

Deposits

Deposits placed with financial institutions will be valued each day by reference to the principal value of such investments and interest accrued thereon, if any, for the relevant period.

Derivatives

Derivative instruments are marked-to-market on a daily basis, where possible. Otherwise, the valuation will be based on fair value as determined in good faith by the Manager on methods or bases that have been verified by the auditor of the Fund and approved by the Trustee.

VALUATION OF THE FUND

Valuation Point

The Fund will be valued at least once every Business Day. The Fund adopts a forward pricing basis which means that prices of Units will be calculated based on the NAV of the Fund at the next valuation point after the application to purchase or redeem Units is received by the Manager.

As the Fund invests in foreign markets, the valuation of the Fund is conducted after the close of a Business Day but not later than 5.00 p.m. of the following Business Day (T+1) due to the different time zones of the foreign markets. Consequently, the daily NAV of the Fund will be published two (2) Business Days later instead of the next Business Day. If application for sale or redemption is received by the Manager on or before the cut-off time of 4.00 p.m. on any Business Day, say, Tuesday, the Tuesday's Unit pricing shall apply and will be calculated on Wednesday (if Wednesday is a Business Day). Tuesday's Unit pricing will be published on Thursday (T+2).

You may contact the Manager directly or visit the Manager's website, www.eastspring.com/my, to obtain the latest NAV per Unit of the Fund.

POLICY ON GEARING

The Fund is not permitted to obtain cash financing or borrow other assets (including those within the meaning of the Securities Borrowing and Lending Guidelines) in connection with its activities. However, the Fund may obtain cash financing for the purpose of meeting redemption request for Units and for short-term bridging requirement. Such financings are subject to the following:

- the Fund's financing is only on a temporary basis and that financing is not persistent;
- the financing period should not exceed a month;
- the aggregate financing of the Fund should not exceed 10% of the Fund's NAV at the time the financing is incurred; and
- the Fund may only obtain financing from financial institutions.

Investment Objective of the Target Fund

The Target Fund aims to generate total returns in line with Asia Pacific ex Japan equity markets, via a combination of capital growth and income, but with lower volatility[#]. The Target Fund will invest primarily in equities and equity-related securities of companies, which are incorporated, listed in or have their area of primary activity in the Asia Pacific ex-Japan region. The Target Fund may also invest in depositary receipts including ADRs and GDRs, debt securities convertible into common shares, preference shares and warrants.

[#] The lower volatility in this context refers to the comparison between the Target Fund's volatility versus the volatility of the MSCI AC Asia Pacific ex-Japan Index.

Investment Policies of the Target Fund

In choosing investments, the Investment Manager starts with a broad regional universe of stocks and shortlists them on the basis of investability and desirable characteristics (e.g., value and positive analyst sentiment, among other factors). Portfolio construction and stock selection are quantitative, with an optimisation process applied to derive the optimal weights to construct a low volatility portfolio from an investable universe. A number of constraints such as maximum individual stock weight, portfolio concentration, liquidity, sector, country and style exposures, etc. are applied in order to manage systematic and stock-specific risk.

The Target Fund aims to outperform the return of MSCI AC Asia Pacific ex Japan Minimum Volatility Index ("Benchmark"). The Target Fund is actively managed. The Benchmark has been selected because it is representative of the investment universe of the Target Fund and it is therefore an appropriate performance comparator. The majority of the Target Fund's equity securities will not necessarily be components of, or have weightings derived from the Benchmark. The Investment Manager may use its discretion to overweight or underweight certain components of the Benchmark and may invest in companies or sectors not included in the Benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Target Fund will moderately deviate from the Benchmark.

ESG Characteristics

The Target Fund is a fund qualifying as Article 8 fund within the meaning of Sustainable Finance Disclosure Regulation (EU 2019/2088), promoting environmental (E) and social (S) characteristics without engaging into sustainable investing. The Target Fund promotes E S characteristics, including but not limited to, factors affecting climate change (carbon emissions, pollution, waste management, energy efficiency, sustainable production practices), and resource management; corporate governance issues such as board independence, alignment of interests to goals besides shareholder profits and gender diversity; and social objectives including diversity and inclusion, health and wellbeing, safety and security, fair labour practices and more equal access to financial services; from here on known as "ESG Characteristics" all from a perspective of materiality.

Exclusions, Positive ESG selection, ESG integration and ESG engagement/ proxy voting are the binding elements of the strategy used to select the investments to attain each of the environmental or social characteristics. The Target Fund shall invest up to a maximum of 100% in equity and equity-related securities with a possibility to hold a maximum of 10% in cash as allowed under Luxembourg regulations. The Investment Manager shall ensure that 100% of equity and equity-related securities holdings of the Target Fund or a minimum 90% of the assets of the Target Fund will be aligned with environmental or social characteristics.

In addition to the bank deposits at sight referred to above and for liquidity management purposes and/or to deal with adverse market conditions, the Target Fund may invest in money market instruments and/or money market funds.
3. Furthermore, the Target Fund may also subscribe for, acquire and/or hold shares issued or to be issued by one or more other sub-funds of the SICAV, if:
- (a) the target sub-fund does not, in turn, invest in the Target Fund invested in this target sub-fund; and
 - (b) no more than 10% of the net assets of the target sub-funds whose acquisition is contemplated may, pursuant to the prospectus of the Target Fund and the articles of incorporation, be invested in shares of other target sub-funds; and
 - (c) voting rights, if any, attaching to the relevant shares are suspended for as long as they are held by the Target Fund; and
 - (d) in any event, for as long as these shares are held by the Target Fund, their value will not be taken into consideration for the purposes of verifying the minimum threshold of the net assets imposed by the 2010 Law.
4. Lastly, the SICAV may also, to the widest extent permitted by the 2010 Law and all applicable Luxembourg regulations:
- (a) create a sub-fund qualifying either as a feeder UCITS sub-fund or as a master UCITS sub-fund;
 - (b) convert any existing sub-fund into a feeder UCITS sub-fund;
 - (c) change the master UCITS of any feeder UCITS sub-fund.

Risk Diversification

5. In accordance with the principle of risk diversification, the Target Fund will invest no more than 10% of its net assets in transferable securities or money market instruments issued by the same body. The Target Fund may not invest more than 20% of its net assets in deposits made with the same body.
6. The risk exposure to a counterparty of the Target Fund in an OTC derivative transaction may not exceed 10% of its net assets when the counterparty is a credit institution referred to in paragraph (1)(f) above, or 5% of its net assets in any other case.
7. Moreover, the total value of the transferable securities and money market instruments held by the Target Fund in the issuing bodies in each of which it invests more than 5% of its net assets must not exceed 40% of the value of its net assets. This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision.
8. Notwithstanding the limits laid down in sub-sections (5) and (6) above, the Target Fund may not combine:
 - (a) investments in transferable securities or money market instruments issued by,
 - (b) deposits made with and/or,
 - (c) exposures arising from OTC derivatives transactions undertaken with a single body in excess of 20% of its net assets.
9. The following exceptions can be made:
 - (a) The aforementioned limit of 10% can be raised to a maximum of 25% for certain debt securities if they are issued by credit institution whose registered office is situated in a Member State and which is subject, by virtue of law, to particular public supervision for the purpose of protecting the holders of such debt securities. In particular, the amounts resulting from the issue of such debt securities must be invested, pursuant to the law in assets which sufficiently cover, during the whole period of validity of such debt securities, the liabilities arising there from and which are assigned to the preferential repayment of capital and accrued interest in the case of default by the issue. If the Target Fund invests more than 5% of its net assets in such debt securities as referred to above and issued by the same issuer, the total value of such investments may not exceed 80% of the value of the Target Fund's net assets.

- (b) The aforementioned limit of 10% can be raised to a maximum of 35% for transferable securities or money market instruments issued or guaranteed by a Member State, by its local authorities, by another Eligible State or by public international bodies of which one or more Member States are members.
- (c) The transferable securities and money market instruments referred to in exceptions (a) and (b) are not included in the calculation of the limit of 40% laid down in sub-section (7) above.
- (d) The limits stated under sub-sections (5) to (8) and (9)(a) and (b) above, may not be combined and, accordingly, investments in transferable securities or money market instruments issued by the same body or in deposits or derivatives instruments made with this body in accordance with sub-sections (5) to (8) and (9)(a) and (b) above, may not, in any event, exceed a total of 35% of the Target Fund's net assets.
- (e) Companies which are included in the same group for the purposes of consolidated accounts, as defined in accordance with Directive 83/349/EEC or in accordance with recognised international accounting rules are regarded as a single body for the purpose of calculating the limits contained in sub-sections (5) to (9).
- (f) The Target Fund may invest in aggregate up to 20% of its assets in transferable securities and money market instruments with the same group.
- (g) Without prejudice to the limits laid down in sub-section (13) below, the limit of 10% laid down in sub-sections (5) to (9) is raised to a maximum of 20% for investment in equity and/or debt securities issued by the same body when the aim of the investment policy of the SICAV is to replicate the composition of a certain equity or debt securities index which is recognised by the CSSF, on the following basis:
 - the composition of the index is sufficiently diversified,
 - the index represents an adequate benchmark for the market to which it refers,
 - it is published in an appropriate manner.

This limit is 35% where that proves to be justified by exceptional market conditions in particular in Regulated Markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.

10. When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of the above-mentioned restrictions.
11. **The Target Fund is authorised to invest in accordance with the principle of risk spreading up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by a Member State, its local authorities, an OECD member country, a G-20 member country, or public international bodies of which one or more Member State(s) are members, provided that in such event the Target Fund must hold securities from at least six different issues, but securities from any one issue may not account for more than 30% of the total amount.**
12. The Target Fund may, in compliance with applicable regulations, enter into securities lending transactions to ensure efficient portfolio management. However, the Target Fund does not intend to participate in securities lending and repurchase transactions at this juncture. Should the Target Fund decide to enter into securities lending transactions in the future, this Prospectus will be updated.
13. The SICAV will not acquire any shares carrying voting rights which would enable it to exercise significant influence over the management of an issuing body.
14. The Target Fund may not acquire more than:
 - (a) 10% of non-voting shares of the same issuer,
 - (b) 10% of the debt securities issued by the same issuer,
 - (c) 25% of the units of the same UCITS and/or other UCI or
 - (d) 10% of the money market instruments of the same issuer.

The limits laid down in the second, third and fourth indents may be disregarded at the time of acquisition if at that time the gross amount of debt securities or money market instruments, or the net amount of the securities in issue, cannot be calculated.

15. The limits of sub-sections (12) and (13) above are waived as to:
 - (a) transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities;
 - (b) transferable securities and money market instruments issued or guaranteed by a non-Member State;
 - (c) transferable securities and money market instruments issued by public international bodies of which one or more Member States are members;
 - (d) shares held in the capital of a company incorporated in a non-Member State and investing its assets mainly in securities of issuers having their registered office in that State, if under the legislation of that State such a holding represents the only way in which the Target Fund can invest in the securities of the issuers of that State. This derogation only applies if the company has an investment policy complying with sub-sections (5) to (9) (a) to (f) as well as sub-sections (12) to (13) above. If the limits stated in sub-sections (5) to (9) (a) to (f) above are exceeded, the provisions laid down in (11) and (18) shall apply mutatis mutandis;
 - (e) shares held by the Target Fund in the capital of one or more subsidiary companies carrying on only the business of management, advice or marketing in the country/ state where the subsidiary is located, in regard to the repurchase of units at shareholders' request exclusively on its or their behalf.
16. The Target Fund may not borrow more than 10% of its net assets, and then only from financial institutions and on a temporary basis. The Target Fund may, however, acquire foreign currency by means of a back-to-back loan. The Target Fund will not purchase securities while borrowings are outstanding in relation to it, except to fulfil prior commitments and/or exercise subscription rights. However, the Target Fund can borrow up to 10% of its net assets to make possible the acquisition of immovable property essential for the direct pursuit of its business. In this case, these borrowings and those referred to above (temporary borrowings) may not in any case in total exceed 15% of the Target Fund's net assets.

17. The SICAV may not grant credits or act as guarantor for third parties. This limitation does not prevent the SICAV to purchase securities that are not fully paid up, nor to lend securities as further described thereunder. This limitation does not apply to margin payments on option deals and other similar transactions made in conformity with established market practices.
18. The Target Fund will not purchase any securities on margin (except that the Target Fund may obtain such short-term credit as may be necessary for the clearance of purchases and sales of securities) or make short sales of securities or maintain a short position. Deposits on other accounts in connection with option, forward or financial futures contracts, are, however, permitted within the limits provided for here below.
19. The board of directors of the SICAV is authorised to introduce further investment restrictions at any time in the interests of the shareholders, provided these are necessary to ensure compliance with the laws and regulations of those countries in which the SICAV's shares are offered and sold. In this event, the prospectus of the Target Fund will be updated accordingly.
20. If any of the above limitations are exceeded for reasons beyond the control of the SICAV and/or the Target Fund or as a result of the exercise of subscription rights attaching to transferable securities or money market instruments, the SICAV and/or the Target Fund must adopt, as a priority objective, sales transactions for the remedying of that situation, taking due account of the interests of its shareholders.
21. Should the Target Fund be registered with the Taiwan Securities and Futures Commission at a future date, the following investment restrictions for derivatives (as may be amended from time to time) shall apply:
 - (a) The global risk exposure of netted derivatives open position that the Target Fund holds for purpose of increasing investment yield shall not be over 40% of the net assets of the Target Fund;
 - (b) The total contract value of the derivatives short position that the Target Fund holds for hedging purposes shall not exceed the total market value of the hedged assets.

Risk Warning

22. The SICAV must not neglect the following risks/ terms that are linked to the investment in units of other open-ended and closed-ended UCI:
 - (a) If the investment is done in another open-ended or closed-ended UCI which is not subject to any permanent control for the protection of the investors, required by the 2010 Law and carried out by a supervisory authority in its home country, there is less protection against possible losses.
 - (b) Due to possible legal, contractual or juridical constraints, the possibility exists that the investments in other open-ended and closed-ended UCI may only be sold with difficulty.

RISK MANAGEMENT

Liquidity Risk Management

Liquidity risk is the risk that a particular position cannot be easily unwound or offset due to insufficient market depth or market disruption; or that the Target Fund's financial obligations (such as investor redemptions) cannot be met. An inability to unwind a particular investment or portion of the Target Fund's assets may have a negative impact on the value of the Target Fund and to the Target Fund's ability to meet its investment objectives. Additionally, an inability to unwind the Target Fund's assets may have negative implications for investors being able to redeem in a timely fashion, and also to investors who remain invested in the Target Fund.

The Investment Manager has established a liquidity management policy which enables it to identify, assess, monitor and manage the liquidity risks of the Target Fund and to ensure that the liquidity profile of the investments of the Target Fund will facilitate compliance with the Target Fund's obligation to meet redemption requests. Such policy, combined with the liquidity management tools that may be employed, also seeks to achieve fair treatment of shareholders and safeguard the interests of remaining shareholders in case of sizeable redemptions.

The oversight of the liquidity risk management function will be performed by the investment risk department of the Investment Manager and by the permanent risk management function of the Management Company, which are functionally independent from the investment management function, to assess the liquidity of the Target Fund's assets under the current and likely future market conditions.

Liquidity stress testing is performed regularly by the investment risk department of the Investment Manager to assess the Target Fund's estimated liquidity under a determined set of stress market conditions. Liquidity risk monitoring is continuously assessed by the investment risk department and the permanent risk management function and is reported regularly to the Investment Manager, the risk management committee, the Management Company and the directors of the SICAV.

The following tools may be employed by the Management Company to manage liquidity risks:

- (a) the Management Company shall not be bound to redeem on any Valuation Day more than 10% of the net asset value of the Target Fund on such Valuation Day. If such limitation is imposed, this would restrict the ability of a shareholder to redeem the shares he intends to redeem on a particular redemption day;
- (b) the Management Company may suspend redemption under exceptional circumstances. During such period of suspension, shareholders would not be able to redeem their shares of the Target Fund;
- (c) the board of directors of the SICAV may, at its discretion, make a price adjustment to the net asset value per share of the Target Fund (for example, when the Target Fund is experiencing a net outflow of redemptions that requires significant sales of assets or when the Target Fund is experiencing significant levels of net subscriptions relative to its size) to mitigate the effect of dilution. For the Target Fund, price adjustment may either be implemented at the Target Fund's level or at a share class level, depending on the circumstances. For details, please refer to section "Pricing Adjustment Policy/ Swing Pricing of the Target Fund" below. As a result of such adjustment, the net asset value per share will be higher or lower than the net asset value per share which otherwise would be if such adjustment has not been made; and
- (d) the Target Fund may not borrow more than 10% of its net assets, and then only from financial institutions and on a temporary basis. There can be no assurance that the Target Fund will be able to borrow on favourable term.

Use of Certain Techniques and Instruments

The SICAV may use financial derivative instruments for hedging and efficient portfolio management purposes.

The Management Company, on behalf of the SICAV may, for the Target Fund, for the purpose of efficient portfolio management of the assets of the Target Fund and/or to protect its assets and commitments, employ certain techniques and instruments. Efficient portfolio management transactions may not include speculative transactions. These transactions must be economically appropriate (this implies that they are realized in a cost-effective way) and be entered into for one or more of the following specific aims:

- the reduction of risks;
- the reduction of cost; or
- the generation of additional capital gain or income for the fund with an appropriate level of risk, taking into account its risk profile and the risk diversification rules laid down in the investment restrictions.

These transactions include but not limited to the following:

- using swap contracts to adjust interest rate risk;
- using currency derivatives to manage currency risk;
- writing covered call options to generate additional income;
- market access pending the availability of relevant custody accounts on behalf of the Target Fund;
- using volatility derivatives to adjust volatility risk;
- using securities lending transactions; and
- using total return swaps or other swap contracts which have similar characteristics as total return swaps.

The relating risks of these transactions must be adequately captured by the risk management process.

The Management Company, on behalf of the SICAV must ensure that the overall risk associated with derivatives does not exceed the net assets of the Target Fund. The following are taken into account in computing risk: the market value of the underlying instruments, the risk of default, future foreseeable market developments and the period within which the positions are to be liquidated. This also applies to the following two points:

- In the case of investments in derivatives, the overall exposure for the underlying instruments may not exceed the investment limits set forth in the investment restrictions. Investments in index-based derivatives need not be taken into account in the case of the investment limits set forth in the investment restrictions.
- If a derivative has a security or money market instrument as the underlying, it has to be taken into account with regard to compliance with the rules set forth under in the investment restrictions.

In no case whatsoever must recourse to transactions involving derivatives or other financial techniques and instruments cause the Management Company, on behalf of the SICAV to depart from the investment objectives set out in the prospectus of the Target Fund or add substantial supplementary risks in comparison to the SICAV's general risk policy (as described in the prospectus of the Target Fund).

In addition, the financial derivative instruments must comply with the provisions contained in the investment restrictions.

Should the Management Company on behalf of the SICAV decide to enter into derivative transactions for purposes other than hedging and/or efficient portfolio management purposes, the investment policy of the Target Fund will be amended accordingly.

Commitment Approach

The method used to calculate the global exposure of the Target Fund to derivative instruments is the commitment approach.

The Management Company, on behalf of the SICAV shall ensure that the Target Fund's global exposure relating to derivative instruments does not exceed the total net value of its portfolio. The risk exposure is calculated taking into account the current value of the underlying assets, the counterparty risk, future market movements and the time available to liquidate the positions.

Collateral Policy

The collateral policy of the SICAV is as follows:

- permitted types of collateral: cash collateral, government bonds of OECD countries, investment grade corporate bonds, supranational bonds, agency bonds and equities.
- level of collateral: fully collateralized, subject to decisions thresholds as per relevant credit support annex.
- safekeeping of collateral: collateral received is safe-kept with the depositary of the Target Fund or third-party delegates of the depositary, as appropriate.
- haircut policy: no haircut.
- re-investment policy: only reinvestment of cash collateral; non-cash collateral will not be re-invested.

Sales with a right of repurchase transactions, reverse repurchase transactions, and/or repurchase transactions

The Management Company will, for and on behalf of the SICAV and the Target Fund for the time being, not enter into repurchase and reverse repurchase transactions. Should the Management Company decide to use such techniques and instruments in the future, this can be done so at the Management Company's discretion and the prospectus of the Target Fund will be updated accordingly thereafter, subject to regulatory approval.

Transparency of securities financing transactions and of reuse (SFTR)

Apart from securities lending transactions, the Management Company will, for and on behalf of the Target Fund, not make use of other securities financing transactions, including without limitation repurchase agreement transactions or reverse repurchase agreement transactions covered by the SFTR regulations that the Target Fund adheres to.

Securities lending transactions consist in transactions whereby a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested to do so by the lender, such transaction being considered as securities lending for the party transferring the securities or instruments and being considered as securities borrowing for the counterparty to which they are transferred.

Subject to the investment restrictions, the Target Fund may opportunistically and on a temporary basis enter into securities lending transactions for the purpose of efficient portfolio management to generate additional capital or income.

In accordance with the Target Fund's collateral policy as set out in this "Risk Management" section, loaned securities will be collateralised at a minimum of 102% and up to 110% of their value.

Securities lending transactions entail a transfer of ownership of the relevant securities to the borrower. As a consequence, these securities are no longer subject to safekeeping and oversight by the Target Fund's depository. Conversely, any collateral transferred under a title transfer arrangement would become subject to the usual safekeeping and oversight by the Target Fund's depository.

These securities lending transactions may only be entered into with trading counterparties regarded as highly rated global investment banks of any legal form with specific track records and expertise in the types of instruments to be transacted and which have their registered office in one of the OECD countries.

The Target Fund may enter into securities lending transactions only in respect of eligible assets under the 2010 Law which fall within its investment objective.

The assets of the Target Fund may be subject to securities lending transactions and in the proportions indicated below:

- Maximum proportion of Target Fund's net asset value: 25%
- Expected proportion of Target Fund's net asset value: 0% - 25%

The Target Fund will ensure that the volume of securities lending transactions is kept at an appropriate level or that it is entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. The counterparties to efficient portfolio management techniques should be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by the EU law.

PRICING ADJUSTMENT POLICY/ SWING PRICING OF THE TARGET FUND

The actual cost of purchasing or selling assets and investments for the Target Fund may however deviate from the latest available price or net asset value used, as appropriate, in calculating the net asset value per share of the Target Fund due to duties and charges and spreads from buying and selling prices of the underlying investments. These costs have an adverse effect on the value of the Target Fund and are known as "dilution". To mitigate the effects of dilution, the board of directors of the SICAV may, at its discretion, make a price adjustment to the net asset value per share of the Target Fund.

Shares of the Target Fund will in principle be issued, redeemed and converted on the basis of a single price, i.e., the net asset value per share. However - to mitigate the effect of dilution - the net asset value per share may be adjusted for any Valuation Day in the manner set out below depending on whether or not the Target Fund is in a net subscription position or in a net redemption position for such Valuation Day to arrive at the applicable adjusted price (the "Adjusted Price"). Where there is no dealing in the Target Fund or class of the Target Fund on any Valuation Day, the applicable price will be the unadjusted net asset value per share. The board of directors of the SICAV will retain the discretion in relation to the circumstances under which to make such a price adjustment. As a general rule, the requirement to make a price adjustment will depend on whether the net volume of subscriptions, redemptions or conversions of shares in the Target Fund exceeds a certain threshold, as determined by the board of directors of the SICAV, that will require significant purchases of assets or sales of assets in order to provide the required liquidity. The board of directors of the SICAV may make a price adjustment if, in its opinion, the existing shareholders (in case of subscriptions or conversions) or remaining shareholders (in case of redemptions or conversions) might otherwise be adversely affected. In particular, the price adjustment may be made where, for example but without limitation:

- a) the Target Fund is in continual decline (i.e. is experiencing a net outflow of redemptions that requires significant sales of assets);
- b) the Target Fund is experiencing significant levels of net subscriptions relative to its size;
- c) the Target Fund is experiencing a net subscription position or a net redemption position on any Valuation Day that requires significant purchases or sales of assets;
- d) in any other case where the board of directors of the SICAV is of the opinion that the interests of shareholders require the imposition of a price adjustment.

The price adjustment will involve adding to, when the Target Fund is in a net subscription position, and deducting from, when the Target Fund is in a net redemption position, the net asset value per share such figure as the board of directors of the SICAV considers an appropriate figure to meet duties and charges and spreads. In particular, the net asset value of the Target Fund will be adjusted (upwards or downwards) by an amount which reflects (i) the estimated fiscal charges, (ii) dealing costs that may be incurred by the Target Fund and (iii) the estimated bid/offer spread of the assets in which the Target Fund invests. As certain stock markets and jurisdictions may have different charging structures on the buy and sell sides, the resulting adjustment may be different for net inflows than for net outflows. Adjustments will however be limited to a maximum of 2% of the then applicable net asset value per share. However, under exceptional circumstances the board of directors of the SICAV may, in the interest of shareholders, decide to increase beyond the maximum swing factor indicated above. In such case board of directors of the SICAV would inform the investors.

The Adjusted Price of each class in the Target Fund will be calculated separately but any price adjustment will in percentage terms affect the Adjusted Price of each class in an identical manner. On the occasions when the price adjustment is not made there may be an adverse impact on the total assets of the Target Fund.

For the avoidance of doubt, for the Target Fund, price adjustment may either be implemented at the Target Fund's level or at a share class level, depending on the circumstances and does not address the specific circumstances of each individual investor transaction.

REDEMPTION POLICY OF THE TARGET FUND

Any shareholder (such as the Fund) has the right at any time to have all or part of his shares in the Target Fund redeemed by the Management Company. Any shares redeemed by the Management Company will be cancelled.

Any request for redemption shall be irrevocable except during any period when the determination of the net asset value of the Target Fund is suspended by the Management Company as described in the "Suspension Policy of the Target Fund" section below. In the absence of revocation, redemption will occur as of the first applicable Valuation Day after the end of suspension.

The redemption price of shares may be higher or lower than the subscription price paid by the shareholder at the time of subscription, depending on whether the net asset value has appreciated or depreciated.

The SICAV shall have the right if the board of directors of the SICAV so determines and with the consent of the redeeming shareholder(s), to satisfy payment of the redemption price to any shareholder in whole or in part "in-kind" by allocating to such shareholders assets of the Target Fund equal in value as of the Valuation Day on which the redemption price is calculated to the net asset value of the shares to be redeemed, as the case may be adjusted in accordance with the "Pricing Adjustment Policy/ Swing Pricing of the Target Fund" section above. The nature and type of assets to be transferred in such case shall be determined on a fair and reasonable basis and without prejudicing the interests of the other shareholders. Any such in-kind redemptions will be valued in a report by the auditors which qualifies as a *"réviseur d'entreprises agréé"*. The cost of such report shall be borne by the redeeming shareholder(s) unless such in-kind payments are in the interests of all the shareholders in which such costs will be borne entirely or partially by the Target Fund.

Settlements will normally be made by electronic transfer. The settlement period for payments of redemption proceeds is within three (3) business days of the Target Fund from the relevant Valuation Day, subject to the redemption request is in good order. Any non-business days for the Target Fund falling within the settlement period are excluded from the calculation of the settlement date. If, on the settlement date, the banks are not open for business in the country of the currency settlement and/or the country of the reference market of the Target Fund, then settlement will be on the next business day of the Target Fund on which those banks are open. Upon request of a shareholder, the Management Company may authorise a shorter settlement period for the payment of redemption proceeds, if approved by the Investment Manager in the interest of shareholder and sufficiently justified (e.g. in order to anticipate a Luxembourg bank holiday).

SUSPENSION POLICY OF THE TARGET FUND

The Management Company may suspend the determination of the net asset value of the Target Fund and the issue and redemption of the shares of the Target Fund as well as the conversion from and to shares of the Target Fund, in consultation with the depositary of the Target Fund, having regard to the best interest of the shareholders during:

- any period when any of the principal markets or stock exchanges on which a substantial portion of the investments of the Target Fund from time to time is quoted, is closed otherwise than for ordinary holidays, or during which dealings thereon are restricted or suspended;
- the existence of any state of affairs which constitutes an emergency as a result of which disposal or valuation of assets owned by the Target Fund would be impracticable;
- any breakdown in the means of communication normally employed in determining the price or value of any of the investments attributable to the Target Fund or the current prices or values on any market or stock exchange;
- any period when the SICAV is unable to repatriate funds for the purpose of making payments on the redemption of shares of the Target Fund or during which any transfer of funds involved in the realisation or acquisition of investments or payments due on redemption of shares of the Target Fund cannot in the opinion of the directors of the Management Company be effected at normal prices or rates of exchange;
- any period when the SICAV is being liquidated or as from the date on which notice is given of a meeting of shareholders at which a resolution to liquidate the SICAV (or the Target Fund) is proposed;
- any situation provided for in the 2010 Law and any applicable regulations;
- in the case of a merger, if the board of directors of the SICAV deems this to be justified for the protection of the shareholders.

Any such suspension shall be published by the Management Company and shall be notified to shareholders requesting subscription, redemption or conversion of their shares by the Management Company at the time of the filing of their request for such subscription, redemption or conversion.

Furthermore, the Management Company shall not be bound to redeem and convert on any Valuation Day more than 10% of the net asset value of the Target Fund on such Valuation Day. The Management Company may defer, on a "first in, first out" basis (i.e. when processing the requests for redemption and/or conversion, the request(s) which is received by The Bank of New York Mellon SA/NV Luxembourg branch, as the central administration agent, with an earlier timestamp shall be redeemed and/or converted first), any requests for redemption and/or conversion on any Valuation Day when the redemption and/or conversion requests received on a particular Valuation Day exceeds 10% of the net asset value of the Target Fund. The deferred requests for redemption and/or conversion will continue to be given priority to subsequently received requests and dealt on the next Valuation Day insofar the aforementioned limit is not exceeded.

Pricing Policy

➤ Single Pricing Policy

The Manager adopts the single pricing policy, i.e. the selling price and repurchase price are fixed at the initial offer price during the Fund's initial offer period. After the initial offer period, the selling price and repurchase price will be the NAV per Unit rounded to four (4) decimal places.

➤ Forward Pricing

The Fund is valued on a forward pricing basis. The daily NAV per Unit is valued at the next valuation point after the application to purchase or redeem Units is received by the Manager.

➤ Incorrect Valuation and Pricing

The Manager shall ensure that the Fund and the Units are correctly valued and priced according to the Deed and all relevant laws. Where there is a significant error in the valuation of the Fund and pricing of Units, the Manager shall take remedial action to correct the error. The Manager's remedial action will involve the reimbursement of money in the following manner:

The reimbursement of money shall be made to Unit Holder if the incorrect valuation and pricing:

- (a) is equal or more than 0.50% of the NAV per Unit; and

*Note: * The documents listed may be subject to changes from time to time.*

A Unit Holder may be required to forward to the Manager additional documents to authenticate his identification when transacting Units of the Fund. The Manager reserves the right to reject any application without providing any reason.

The Manager allows a Unit Holder the convenience of maintaining all his investments in ONE single master account regardless of the number of funds he invests with the Manager.

PURCHASE APPLICATION AND ACCEPTANCE

Purchase application should be made before the cut-off time of 4.00 p.m. on any Business Day. The Units will be issued at NAV per Unit calculated at the next valuation point (i.e. forward pricing) after the purchase application is received by the Manager. The cut-off time will be determined based on the transaction submission time (online submission) or stamped time and date made at the Manager's head office and branch offices (manual submission).

Note: Our Authorised Distributors may have an earlier cut-off time for purchase of Units request. Please check with the respective Authorised Distributors for their respective cut-off time.

When the purchase application is received after the cut-off time stated above, the purchase application will be deemed to have been received on the next Business Day. The Manager reserves the right to vary the terms and conditions of investment and payment modes from time to time, which shall be communicated to you in writing. The Manager reserves the right to reject any application without providing any reason. The Manager may also reject any application that is incomplete and/or not accompanied by the required documents.

HOW TO PAY FOR AN INVESTMENT

A Unit Holder can make payment via telegraphic or online transfer by submitting the telegraphic or online transfer statement together with the application to the Manager. Please visit www.eastspring.com/my for details of the Manager's client trust bank account.

A Unit Holder can also make payment by issuing cheque or bank draft made payable to "**Eastspring Investments Berhad**".

Cheques can be deposited directly into the Manager's client trust bank account by using a bank deposit slip at any branch of the Manager's principal bankers. Please visit www.eastspring.com/my for details of the Manager's client trust bank account. The original client's copy of the bank deposit slip (proof of payment) and remittance application form (if payment is made with bank draft) must be sent together with the application for Units. Unit Holders are encouraged to indicate their name and Malaysian National Registration Identity Card ("NRIC") number or passport number (for foreigner) on the bank deposit slip.

The Manager will not accept any cash payment, cash payment through Automated Teller Machine ("ATM"), cash deposits over the bank counter, or third-party payment (i.e. payment made via an account that is not under the name of the Unit Holder).

All fees, charges and expenses incurred or to be incurred for payment shall be borne by the Unit Holder.

**INVESTORS MUST NOT MAKE PAYMENT IN CASH TO ANY INDIVIDUAL AGENT
WHEN PURCHASING UNITS OF THE FUND.**

HOW TO REDEEM UNITS

A Unit Holder may redeem all or some of the Units held on any Business Day by executing a sell transaction via online through myEastspring or completing a transaction form.

Redemption application should be made before the cut-off time of 4.00 p.m. on any Business Day. The Units will be redeemed at NAV per Unit calculated at the next valuation point (i.e. forward pricing) after the redemption application is received by the Manager. The cut-off time will be determined based on the transaction submission time (online submission) or stamped time and date made at the Manager's head office and branch offices (manual submission).

Note: Our Authorised Distributors may have an earlier cut-off time for redemption of Units request. Please check with the respective Authorised Distributors for their respective cut-off time.

When the redemption application is received after the cut-off time stated above, the redemption application will be deemed to have been received on the next Business Day. The Manager reserves the right to vary the terms and conditions for redemption from time to time, which shall be communicated to you in writing.

The redemption proceeds of the Target Fund will be paid to the Fund within three (3) Business Days from the date the Management Company receives the duly completed redemption application from the Manager. As such, you will be paid no later than eight (8) Business Days from the date the redemption request is received by the Manager **via e-payment ONLY according to your bank account details as stated in your myEastspring account or in the master account opening form or redemption form**, or in such other manner as determined by the Manager on a case-to-case basis. If you redeem immediately after the purchase of Units, the Manager shall have the right to withhold the redemption application until sufficient time has elapsed to ensure that the amount remitted by you (for purchase of Units) is realised and credited to the Manager's client trust bank account.

Should the redemption request of the Target Fund be deferred or suspended, the redemption of the Fund may also be deferred or suspended accordingly.

Should the redemption request of the Fund be deferred due to total net redemption received by the Target Fund on a particular Business Day be more than 10% of the net asset of the Target Fund, redemptions may be deferred for processing. This is because the Management Company shall not be bound to redeem on any Valuation Day more than 10% of the net asset value of the Target Fund on such Valuation Day.

The Management Company may defer, on a "first in, first out" basis (*i.e. when processing the requests for redemption, the request(s) which is received by the Management Company shall be redeemed first*), any requests for redemption on any Valuation Day when the redemption requests received on a particular Valuation Day exceeds 10% of the net asset value of the Target Fund.

The deferred requests for redemption will continue to be given priority to subsequently received requests and dealt on the next Valuation Day insofar the aforementioned limit is not exceeded. Should this occur, we will pay our Unit Holders the redemption proceeds within five (5) Business Days upon receiving the redemption proceeds from the Target Fund.

Should the redemption request for the Fund be suspended due to the Target Fund being suspended, we will pay our Unit Holders the redemption proceeds within five (5) Business Days upon receiving the redemption proceeds from the Target Fund.

Redemption proceeds for Units of a Class will be paid in the currency of the Class.

COOLING-OFF PERIOD & COOLING-OFF RIGHT

The cooling-off right is only given to an individual investor who is investing in any of the unit trust funds managed by the Manager for the first time but shall not include the following persons:

- the Manager's staff; and
- a person registered with a body approved by the SC to deal in unit trusts.

The cooling-off right allows Unit Holder the opportunity to reverse an investment decision which could have been unduly influenced by certain external elements or factors.

There is a cooling-off period of six (6) Business Days commencing from the day your application is accepted or deemed to be accepted by the Manager. Within these six (6) Business Days, you have the right to request for withdrawal of the investment. The refund for every Unit held by you pursuant to the exercise of your cooling-off right are as follows:

- (a) if the NAV per Unit on the day the Units were first purchased ("original price") is higher than the price of a Unit at the point of exercise of the cooling-off right ("market price"), the market price at the point of cooling-off; or
- (b) if the market price is higher than the original price, the original price at the point of cooling-off; and
- (c) the sales charge per Unit originally imposed on the day the Units were purchased.

Unit Holder may exercise the cooling-off right on any Business Day by executing a sell transaction via online through myEastspring or completing a transaction form.

Cooling-off application should be made before the cut-off time of 4.00 p.m. on any Business Day.

The cut-off time will be determined based on the transaction submission time (online submission) or stamped time and date made at the Manager's head office and branch offices (manual submission).

When a cooling-off application is received after the cut-off time stated above, the cooling-off application will be deemed to have been received on the next Business Day. The Manager reserves the right to vary the terms and conditions of cooling-off from time to time, which shall be communicated to you in writing.

Cooling-off proceeds will be refunded to you via e-payment ONLY according to the bank account details as stated in your myEastspring account or in the master account opening form or redemption form, or in such other manner as determined by the Manager on a case to case basis, no later than seven (7) Business Days from the date the Manager receives the duly completed cooling-off application, provided that the Manager has received cleared funds for the original investment.

SWITCHING BETWEEN FUNDS

A Unit Holder is allowed to switch the Units held in the Fund to another fund managed by the Manager denominated in the same currency by executing a switch transaction via online through myEastspring or completing a transaction form. There is no switching fee imposed on switching of Units but Unit Holders have to pay the difference of sales charge if Unit Holders wish to switch to another fund with a higher sales charge. However, no sales charge will be imposed if the fund to be switched to has a lower sales charge than the Fund.

There is no limit on the frequency of switching. However, during the initial offer period, the units of other funds are not allowed to switch to Units of the Fund except at the Manager's discretion.

Switching application should be made before the cut-off time of 4.00 p.m. on any Business Day. The Units will be switched at NAV per Unit calculated at the next valuation point (*i.e. forward pricing*) after the switching application is received by the Manager. The cut-off time will be determined based on the transaction submission time (online submission) or stamped time and date made at the Manager's head office and branch offices (manual submission).

Note: Our Authorised Distributors may have an earlier cut-off time for switching of Units request. Please check with the respective Authorised Distributors for their respective cut-off time.

When a switching application is received after the cut-off time stated above, the switching application will be deemed to have been received on the next Business Day. The Manager reserves the right to vary the terms and conditions for switching from time to time, which shall be communicated to you in writing.

The Manager reserves the right to charge the differential sales charge between the two (2) transacted funds.

The table below sets out the switching between funds with different sales charge.

Switching from existing fund	Switching to intended fund	
	Fund with NO sales charge	Fund with sales charge
Fund with sales charge	Switch at NAV per Unit	Switch at NAV per Unit, the differential sales charge between the two (2) funds shall be borne by the Unit Holder.
Fund with NO sales charge		Note: If a switch is made into the Units of the Fund from other fund with a higher sales charge imposed, no sales charge will be imposed on the Unit Holder.

The table below sets out as a guide when the Unit Holder switches out of the Fund into another fund managed by the Manager. All switches will be transacted on the same day except the following:

Switch out	Switch in	Switch out date	Switch in date
Eastspring Asian Low Volatility Equity MY	Money market funds	T day	T + 6 Business Days

TRANSFER OF UNITS

A Unit Holder may transfer some or all of his Units held in the Fund to another Unit Holder by completing a transfer form.

A transfer is subject to the minimum balance and terms and conditions applicable for the Fund. However, both the transferor and the transferee should maintain the minimum holding of Units for the Fund after the transfer is made. If the transferee does not have any account with the Manager prior to this transfer application, he must forward the completed documents listed in pages 24 to 25 of this prospectus to the Manager for account opening in addition to a transfer form.

Transfer application should be made before the cut-off time of 4.00 p.m. on any Business Day. The cut-off time will be determined based on the stamped time and date made at the Manager's head office.

Note: Our Authorised Distributors may have an earlier cut-off time for transfer of Units request. Please check with the respective Authorised Distributors for their respective cut-off time.

When the transfer application is received after the cut-off time stated above, the transfer application will be deemed to have been received on the next Business Day. SUSPENSION OF SALE AND REDEMPTION OF UNITS

The Manager may, in consultation with the Trustee and having considered the interests of Unit Holders, suspend dealing in Units of the Fund when the Target Fund is suspended as stipulated under Section 4 of "Suspension Policy of The Target Fund".

Should the redemption request of the Target Fund be deferred or suspended, the redemption of the Fund may also be deferred or suspended accordingly.

Should the redemption request of the Fund be deferred due to total net redemption received by the Fund on a particular Business Day be more than 10% of the NAV of the Fund, redemptions may be deferred for processing. This is because the Management Company shall not be bound to redeem on any Valuation Day more than 10% of the NAV of the Target Fund on such Valuation Day.

As such, Unit Holders should take note that the Fund will also defer redemption when the Target Fund defers redemption exceeding 10% of the Target Fund's NAV.

The Management Company may defer, on a "first in, first out" basis (*i.e. when processing the requests for redemption, the request(s) which is received by the Management Company shall be redeemed first*), any requests for redemption on any Valuation Day when the redemption requests received on a particular Valuation Day exceeds 10% of the NAV of the Target Fund.

The deferred requests for redemption will continue to be given priority to subsequently received requests and dealt on the next Valuation Day insofar the aforementioned limit is not exceeded. Should this occur, we will pay our Unit Holders the redemption proceeds within five (5) Business Days upon receiving the redemption proceeds from the Target Fund.

Should the redemption request for the Fund be suspended due to the Target Fund being suspended, we will pay our Unit Holders the redemption proceeds within five (5) Business Days upon receiving the redemption proceeds from the Target Fund.

The Manager will cease the suspension as soon as practicable after the circumstances which result in the suspension have ceased, and in any event within twenty-one (21) days of the commencement of suspension. The period of suspension may be extended if the Manager satisfies the Trustee that it is in the best interests of the Unit Holders for the dealing in Units to remain suspended and such extension will be subject to weekly review by the Trustee. Nevertheless, the action to suspend redemption requests from the Unit Holders shall be exercised only as a last resort by the Manager.

The Manager will inform the Unit Holders in a timely and appropriate manner of the decision to defer or suspend dealing in Units of the Fund.

Please note that the transaction procedures such as investment, redemption, cooling-off, switching and transfer of Units via our distribution channels may differ from that described in this prospectus, and you are advised to check with the relevant Authorised Distributor for details on these procedures.

Minimum Redemption (Units)

In the case of a partial redemption, instructions will be carried out only if the minimum holding of Units (being 1,000 Units or such other number of Units as the Manager may determine from time to time) remains in the Fund after the redemption. If the Units in a Unit Holders' account are less than the minimum holding of Units after a redemption application is made, all Units that the Unit Holder holds in the Fund will be redeemed automatically.

Minimum Switched Out (Units)

There is no limit on the frequency of switching; however, there is a minimum of 1,000 Units to be switched. The Manager may at its sole discretion disallow switching into any fund which is managed by the Manager from time to time.

After a switching application is made, Units in a Unit Holder's account for both the Fund and the fund to be switched into should maintain the minimum holding of Units.

- If the Units in the Unit Holder's account for the Fund are less than the minimum holding of Units after a switching application is made, all Units that the Unit Holder holds in the Fund will be switched out automatically.
- If the Units in the Unit Holders' account for the fund to be switched into are less than the minimum holdings of Units after a switching application is made, the Manager may at its sole discretion disallow switching.

Any fees or charges imposed by the bank will be borne by the Unit Holder.

The Manager reserves the right to reinvest income distribution without providing any reason if the instruction in the master account opening form or written instruction is incomplete. **In the absence of a registered bank account, the distribution (if any) will be reinvested.**

TAXATION OF THE FUND AND UNIT HOLDERS

Dear Sirs,

This letter has been prepared for inclusion in the First Prospectus in connection with the Eastspring Investments Asian Low Volatility Equity MY Fund ("the Fund").

The taxation of income for both the Fund and the Unit Holders are subject to the provisions of the Malaysian Income Tax Act 1967 ("the Act"). The applicable provisions are contained in Section 61 of the Act, which deals specifically with the taxation of trust bodies in Malaysia.

TAXATION OF THE FUND

The Fund will be regarded as resident for Malaysian tax purposes since the Trustee of the Fund is resident in Malaysia.

(1) Foreign Investments

Gross foreign-sourced income remitted to Malaysia by Malaysian resident unit trusts will be subject to Malaysian income tax at the prevailing rate, currently at 24%.

Such income from foreign investments may be subject to taxes or withholding taxes in the specific foreign country. Subject to meeting the relevant prescribed requirements, the Fund in Malaysia is entitled for double taxation relief on any foreign tax suffered on the income in respect of overseas investments.

In addition, effective from 1 January 2024, the scope of taxable foreign source income received in Malaysia has been expanded to include capital gains from disposal of assets outside Malaysia brought into Malaysia. See Capital Gains Tax ("CGT") section below for further details.

Exemption from tax on foreign-sourced income for unit trusts

The Finance Minister II on 16 January 2024 has announced that unit trusts in Malaysia will be exempted from income tax on foreign-sourced income (including capital gains from disposal of assets outside Malaysia), provided that economic substance requirements are met.

To qualify for this tax exemption, unit trust must satisfy one of the following conditions:

- a. Option A – The FSI has been subjected to foreign tax, with the source jurisdiction's minimum headline income tax rate being at least 15%; or
- b. Option B – The management company of the unit trust has met Economic Substance Requirements (ESR) in Malaysia, which includes employing an adequate number of employees and incurring sufficient operating expenditure.

Consistent with the announcement, the exemption from income tax on foreign-sourced income takes effect from 1 January 2024 until 31 December 2026.

(2) Domestic Investments

(i) General Taxation

Subject to certain exemptions, the income of the Fund consisting of dividends or interest (other than interest which is exempt from tax) and other investment income derived from or accruing in Malaysia, after deducting tax allowable expenses, is liable to Malaysian income tax at the rate of 24 per cent.

In addition, with effect from 1 January 2024, gains from disposal of capital assets will be subject to Capital Gains Tax ("CGT"). Please refer to the CGT section below for further details.

(ii) Dividends and Other Exempt Income

Effective 1 January 2014, all companies would adopt the single-tier system. Hence dividends received would be exempted from tax and the deductibility of expenses incurred against such dividend income would be disregarded. There will no longer be any tax refunds available for single-tier dividends received. Dividends received from companies under the single-tier system would be exempted.

The Fund may receive Malaysian dividends which are tax exempt. The exempt dividends may be received from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Fund will not be taxable on such exempt income.

Interest or discount income derived from the following investments is exempt from tax:

- (a) Securities or bonds issued or guaranteed by the government of Malaysia;
- (b) Debentures¹ or sukuk, other than convertible loan stocks, approved or authorized by, or lodged with, the Securities Commission Malaysia; and
- (c) Bon Simpanan Malaysia issued by Bank Negara Malaysia.

Interest income derived from the following investments is exempt from tax:

- (a) Interest income paid or credited by any bank or financial institution licensed under the Financial Services Act 2013 and Islamic Financial Services Act 2013;
- (b) Interest income paid or credited by any development financial institution regulated under the Development Financial Institutions Act 2002;
- (c) Bonds, other than convertible loan stocks, paid or credited by any company listed in Bursa Malaysia Securities Berhad ACE Market; and
- (d) Interest income paid or credited by Malaysia Building Society Berhad².

The interest income or discount income exempted from tax at the Fund level will also be exempted from tax upon distribution to the Unit Holders.

Exception: -

- i. Wholesale money market fund

With effect from 1 January 2019, the exemption shall not apply to interest paid or credited to a unit trust that is a wholesale money market fund.

- ii. Retail money market fund ("RMMF")

Based on the Finance Act 2021, the interest income of a RMMF will remain tax exempted under Paragraph 35A, Schedule 6 of the Act. However, resident and non-resident Unit Holders (other than individual Unit Holders), who receive income distributed from interest income of the RMMF which are exempted under Paragraph 35A of Schedule 6, will be subject to withholding tax ("WHT") at the rate of 24 per cent. This new WHT is effective from 1 January 2022 onwards.

The WHT is to be withheld and remitted by the RMMF to the tax authorities within 30 days upon distribution of the income to the Unit Holders.

(3) Hedging Instruments

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into.

Generally, any gain/ loss relating to the principal portion will be treated as capital gain/ loss. Gains/ losses relating to the income portion would normally be treated as revenue gains/ losses. The gain/ loss on revaluation will only be taxed or claimed upon realisation. Any gain/ loss on foreign exchange is treated as capital gain/ loss if it arises from the revaluation of the principal portion of the investment.

¹ Structured products approved by the Securities Commission Malaysia are deemed to be "debenture" under the Capital Markets and Services Act, 2007 and fall within the scope of exemption.

² Exemption granted through letters from Ministry of Finance Malaysia dated 11 June 2015 and 16 June 2015 and it is with effect YA 2015.

(4) Real Property Gains Tax (“RPGT”)

Currently, any gains on disposal of real properties or shares in real property companies³ (“chargeable asset”) would be subject to RPGT as follows:-

Disposal time frame	RPGT rates (Companies incorporated in Malaysia and Trustee of a trust)
Within 3 years	30%
In the 4 th year	20%
In the 5 th year	15%
In the 6 th year and subsequent years	10%

Effective from 1 March 2024, CGT will be applicable on the gains from sale of Malaysian unlisted shares. Therefore, gains from disposal of all Malaysian unlisted shares will be subjected to CGT from 1 March 2024 instead. Please refer to the section on CGT.

Other real properties disposed of, apart from RPC shares, will continue to be subject to RPGT. RPGT will continue to apply for disposal of RPC shares for individuals.

(5) Capital Gains Tax (“CGT”)

CGT has been introduced in Malaysia and will be imposed on gains from the disposal of capital assets as set out below:

a) Disposal of capital assets from outside Malaysia

The scope of CGT will include gains from the disposal of capital assets situated outside Malaysia, remitted into Malaysia. The foreign gains remitted to Malaysia will be subject to prevailing income tax rates, that is 24%.

The gains are eligible for tax exemption subject to meeting economic substance requirements. As highlighted above, capital gains from disposal of assets outside Malaysia of a unit trust will be exempted if the following conditions can be met:

- (i) Option A – The FSI has been subjected to foreign tax, with the source jurisdiction’s minimum headline income tax rate being at least 15%; or
- (ii) Option B – The management company of the unit trust has met Economic Substance Requirements (ESR) in Malaysia, which includes employing an adequate number of employees and incurring sufficient operating expenditure.

The exemption from income tax on foreign-sourced income takes effect from 1 January 2024 until 31 December 2026.

b) Disposal of Malaysian unlisted shares

Effective from 1 March 2024, CGT will be imposed on the disposal of Malaysian unlisted shares by companies, Limited Liability Partnerships, cooperatives and trust bodies (which include unit trusts).

The CGT rate to be imposed is as follows:

Shares Acquisition Date	CGT Rate
Before 1 January 2024	The taxpayers may choose: i. 10% on the net gain of the disposal of shares; or ii. 2% on the gross disposal price.
From 1 January 2024	10% on the net gain of the disposal of shares

“shares” has been defined as in relation to a company, includes stock other than debenture stock.

Capital Gains Tax exemption – Income Tax (Unit Trust) (Exemption) Order 2024

As announced on 16 January 2024 by the Finance Minister II, Datuk Seri Amir Hamzah Azizan, unit trusts will be exempted from CGT. The exemption on CGT is effective from 1 January 2024 until 31 December 2028.

(6) Tax Deductible Expenses

Expenses wholly and exclusively incurred in the production of gross income are allowable as deductions under Section 33(1) of the Act. In addition, Section 63B of the Act provides for tax deduction in respect of managers’ remuneration, expenses on maintenance of the register of Unit Holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postages based on a formula subject to a minimum of 10 per cent and a maximum of 25 per cent of the expenses.

³ A real property company is a controlled company which owns or acquires real property or shares in real property companies with a market value of not less than 75 percent of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

(7) Sales and Service Tax (“SST”)

Sales tax will be chargeable on taxable goods manufactured in or imported into Malaysia, unless specifically exempted by the Minister. Whereas, only specific taxable services provided by specific taxable persons will be subject to service tax. Sales tax and service tax are single stage taxes. As such, SST incurred would generally form an irrecoverable cost to the business. The rates for sales tax are nil, 5 per cent, 10 per cent or a specific rate whereas the rate for service tax is at 8 per cent for all prescribed taxable services with certain exceptional taxable services i.e. food and beverages services, telecommunication services, parking services and logistics which remain at 6 per cent.

In general, the Fund, being a collective investment vehicle, will not be caught under the service tax regime.

Certain brokerage, professional, consultancy or management services obtained by the Fund may be subject to service tax at 8 percent. However, fund management services and trust services are excluded from service tax.

Service tax will apply to any taxable service that is acquired by any business in Malaysia from a non-Malaysian service provider. In this connection, the Fund, being non-taxable person who acquire imported taxable services (if any) will need to declare its imported taxable services through the submission of prescribed declaration, i.e. Form SST-02A to the Royal Malaysian Customs Department (“RMCD”).

Service tax on digital services was implemented at the rate of 8 per cent. Under the service tax on digital services, foreign service providers selling digital services to Malaysian consumers are required to register for and charge service tax. Digital services are defined as services which are delivered or subscribed over the internet or other electronic network, cannot be delivered without the use of IT and the delivery of the service is substantially automated.

Furthermore, the provision of digital services has also been prescribed as a taxable service when provided by a local service provider. Hence, where the Fund obtains any of the prescribed digital services, those services may be subject to service tax at 8 percent.

TAXATION OF UNIT HOLDERS

Unit Holders will be taxed on an amount equivalent to their share of the total taxable income of the Fund to the extent of the distributions received from the Fund. The income distribution from the Fund will carry a tax credit in respect of the Malaysian tax paid by the Fund. Unit Holders will be entitled to utilise the tax credit against the tax payable on the income distribution received by them. Generally, no additional withholding tax will be imposed on the income distribution from the Fund; unless the Fund is an RMMF, in which case there is a WHT on distribution from interest income of a RMMF which are exempted under Paragraph 35A of Schedule 6 and distributed to non-individual Unit Holders.

Non-resident Unit Holders may also be subject to tax in their respective jurisdictions. Depending on the provisions of the relevant country's tax legislation and any double tax treaty with Malaysia, the Malaysian tax suffered may be creditable against the relevant foreign tax.

Corporate Unit Holders, resident⁴ and non-resident, will generally be liable to income tax at 24 per cent on distribution of income received from the Fund. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these Unit Holders.

Individuals and other non-corporate Unit Holders who are tax resident in Malaysia will be subject to income tax at graduated rates ranging from 1 per cent to 30 per cent. Individuals and other non-corporate Unit Holders who are not resident in Malaysia will be subject to income tax at 30 per cent. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these Unit Holders.

The distribution of exempt income by the Fund will be exempted from tax in the hands of the Unit Holders.

Based on the Finance Act 2021, in respect of distribution from a RMMF, resident and non-resident corporate Unit Holders (other than individual Unit Holders), who receive income distributed from interest income of the RMMF which are exempted under Paragraph 35A of Schedule 6, will be subject to WHT at the rate of 24 per cent.

For resident corporate Unit Holders, the WHT is not a final tax. The resident corporate Unit Holders will need to subject the income distributed from interest income of a RMMF which are exempted under Paragraph 35A of Schedule 6 to tax in its income tax returns and the attached tax credit i.e. the 24 per cent WHT suffered will be available for set-off against the tax chargeable on the resident corporate Unit Holders.

⁴ Resident companies with paid up capital in respect of ordinary shares of RM2.5 million and below and having an annual sales of not more than RM50 million will pay tax at 15% for the first RM150,000 of chargeable income, 17% for RM150,001 to RM600,000 with the balance taxed at 24% with effect from YA 2023.

The above shall not apply if more than –

- (a) 50% of the paid up capital in respect of ordinary shares of the company is directly or indirectly owned by a related company;

UNIT TRUST LOAN FINANCING RISK DISCLOSURE STATEMENT**Investing in a Unit Trust Fund with Borrowed Money is More Risky than Investing with Your Own Savings**

You should assess if loan financing is suitable for you in light of your objectives, attitude to risk and financial circumstances. You should be aware of the risks, which would include the following:

1. The higher the margin of financing (that is, the amount of money you borrow for every ringgit of your own money which you put in as deposit or down payment), the greater the loss or gain on your investment.
2. You should assess whether you have the ability to service the repayments on the proposed loan. If your loan is a variable rate loan, and if interest rates rise, your total repayment amount will be increased.
3. If unit prices fall beyond a certain level, you may be asked to provide additional acceptable collateral (where units are used as collateral) or pay additional amounts on top of your normal instalments. If you fail to comply within the time prescribed, your units may be sold towards the settlement of your loan.

4. Returns on unit trusts are not guaranteed and may not be earned evenly over time. This means that there may be some years where returns are high and other years where losses are experienced. Whether you eventually realise a gain or loss may be affected by the timing of the sale of your units. The value of units may fall just when you want your money back even though the investment may have done well in the past.

This brief statement cannot disclose all the risks and other aspects of loan financing. You should therefore carefully study the terms and conditions before you decide to take a loan. If you are in doubt about any aspect of this risk disclosure statement or the terms of the loan financing, you should consult the institution offering the loan.
