1. Amendments to page 4 of the Prospectus – "Fund Information – Investment Strategy"

The information in relation to the investment strategy is hereby deleted and replaced with the following:

The Fund seeks to achieve its objective by investing in Shariah-compliant equities which are constituents of the DJIM Global Technology Titans 50 Index, other Shariah-compliant equities and Shariah-compliant equity-related securities (such as Islamic ADRs, Shariah-compliant rights issues and Shariah-compliant warrants) which are listed in Eligible Market, unlisted Shariah-compliant securities and Islamic CIS. The Fund will invest in Shariah-compliant companies involved in the innovation and development of scientific and technological advancements in various fields including but not limited to:

- Information technology software, hardware and services
- Communication services, telecommunications
- Healthcare, pharmaceuticals and biotechnology
- Environment protection
- Consumer products
- Multimedia, aerospace, specialty chemicals, advanced materials and others.

The Fund's investment process involves a combination of top-down and bottom-up approach. The bottom-up, fundamental investment approach is used to identify technology companies with competitive advantages, strong free cash flow, and above average returns on invested capital. This approach employs a growth at a reasonable price (GARP) valuation methodology to assess a company's intrinsic value and set a target investment price. Quantitative screening is also used to evaluate factors such as growth, earnings visibility, earnings quality, and country factor to identify Shariah-compliant stocks with significant upside potential.

The remainder of the Fund's NAV will be invested in Islamic money market instruments and/or Islamic deposits including Islamic CIS investing in such instruments. The Fund may enter into Islamic derivative instruments only for hedging purposes. For example, the Fund may employ currency hedging strategies to hedge the foreign currency exposure to manage the currency risk of the Classes not denominated in the base currency of the Fund.

2. Amendments to page 8 of the Prospectus – "Fund Information – Risk Factors – Specific Risks when Investing in the Fund"

The information in relation to the emerging markets risk is hereby inserted after the Shariah status reclassification risk as follows:

Emerging markets risk

The Fund may have exposure to emerging markets which may involve a higher degree of risk and special consideration not typically associated with investment in more developed markets which could adversely affect the value of the investments, due to the economic and political development

process which some of these countries are undergoing. Among other things, investment in emerging markets involves risks such as the restriction on foreign investment, currency risk, political and economic uncertainties, legal and taxation risks, foreign exchange controls, regulatory risk, counterparty risk, higher market volatility, less public information about companies and the illiquidity of the companies' assets depending on the market conditions in certain emerging markets. These risks may have adverse impact on the NAV of the Fund.

3. Amendments to page 21 of the Prospectus – "Transaction Information – Policy on Anti-Money Laundering, Anti-Terrorism Financing and Proceeds of Unlawful Activities Act 2001"

The information in relation to the policy on Anti-Money Laundering, Anti-Terrorism Financing and Proceeds of Unlawful Activities is hereby deleted and replaced with the following:
