### LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	②	⑤	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

### FUND MANAGER'S COMMENTARY

#### Equity

Malaysian equities started 2024 well, outperforming regional markets as one of the best performing markets. During January, the Johor-Singapore Special Economic Zone (JS-SEZ) MoU was signed between Malaysia and Singapore. The agreement with details to develop the economic zone will be signed at the Malaysia-Singapore Leader's Retreat taking place end of 2024. The key initiatives mentioned as part of this SEZ include the formation of a one-stop business/investment services centre in Johor to facilitate the application process of various approvals and licences necessary for Singapore businesses to set up in Johor; an adoption/ implementation of a passport-free QR code clearance system on both sides; adoption of digitized processed for cargo clearance at land checkpoints; and facilitate the cooperation for renewable energy. On the 31 January 2024, Malaysia saw the installation of a new King, the Sultan of Johor, Sultan Ibrahim, with Sultan Nazrin (the ruler of the state of Perak) was re-elected as deputy King.

The FBM Emas Shariah Index closed the month at 11,278.09, up 2.63% mom. The FBM Small Cap Shariah index gained 1.84% for the month, underperforming the KLCI. The best performing sectors were Utilities (+17.3%) and Oil & Gas (+9.5%). The worst performing sectors were Technology (-2.2%) and Consumer (+0.7%). Average value traded on Bursa in January was RM3,517m higher by 24.7% mom.

Unemployment rate fell slightly to 3.3% in November from 3.4% in the prior month. BNM international reserves increased to US\$ 115.1bn as of mid-January (mid-Dec: US\$112.8bn).
