LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	④	④	Lowest Highest ① ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Equity
Malaysian equities continued to correct in March due to the US-Iran conflict which started on 28 February 2026, and is entering its sixth week. In retaliation to US and Israel's attack, Iran has effectively closed the Straits of Hormuz allowing only certain vessels to pass, impacting global oil and gas supply, as approximately 20% of global supply comes through the Straits of Hormuz. In Malaysia, unsubsidized fuel at the pump has been feeling the brunt of the US-Iran conflict, as unsubsidized RON95 prices has increased by 52% to RM3.87/litre, whilst diesel at the pump which is unsubsidized is priced at RM6.02/litre up 101% versus before the conflict. In addition, the government has reduced the monthly subsidized petrol quota under the BUDI95 scheme from 300 litres to 200 litres beginning April 2026. During the month, Sunway Healthcare IPO listed on Bursa Malaysia, and was immediately added into the FBM Shariah Emas index.

The FBM Emas Shariah Index closed the month at 12,217.56, down 0.82% mom. The FBM Small Cap Shariah index was down 7.22% for the month, underperforming the FBM Emas Shariah Index. The worst performing sectors were Construction (-11.2%) and Technology (-9.6%). The best performing sectors were Plantation (+8.6%) and Oil & Gas (+5.8%). Average value traded on Bursa in March was RM3912m higher by 46% mom.

Fixed Income
In February, headline and core inflation slowed to 1.4% (Jan: 1.6%) and 2% (Jan: 2.3%), respectively, mainly reflecting easing core inflation, including lower price pressures from streaming services and rental. The unemployment rate remained unchanged at 2.9% in January. BNM's international reserves amounted to US\$126.6bn as of 31 March 2026 (27 Feb2026: US\$128.3bn). The reserves position is sufficient to finance 4.6 months of imports and is 0.9x of the total short-term external debt. Meanwhile, the Ringgit depreciated 3.9% m-o-m against USD, closing at 4.046 at end March 2026 (Feb: 3.893), driven by a sharp rebound in the USD, geopolitical-driven risk-off sentiment linked to the Middle East conflict and market expectations for US rate cuts being pushed out.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 31 March 2026, the Volatility Factor (VF) for this Fund is 7.1 and is classified as "Low" (Source: Lipper). "Low" generally includes funds with VF that are higher than 4.37 but not more than 8.135. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
