LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation
①	①	③

Lipper Leaders Key

Lowest ①
Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The Fund decreased by 0.18%, underperformed the required return of +0.65%. The fund's performance was dragged by holdings in Korea, India and Indonesia markets.

In December, US market started strong with optimism on incoming President Trump's pro-growth policies and the general health of the US economy. However, the momentum dwindled post the Fed meeting in December which saw the Fed cut interest rates by 25 bps but signalled a slower-than-expected pace of rate cut into 2025. US 10Y treasury yield spiked from 4.15% to as high as 4.57% as at end Dec 2024. In 2024, Taiwan outperformed all other Asian markets as the most direct beneficiary of the AI structural story. HK/China finally saw a positive return in 2024 after three consecutive years of losses underpinned by the sharp rebound seen in September following stimulus measures announced by the government. Within Asean, Singapore outperformed contributed by the banks and defensive large caps. Korea was the worst performing market in 2024 dragged by Samsung, battery materials and Korean Won despite support from the Value-Up program.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 31 December 2024, the Volatility Factor (VF) for this Fund is 15.4 and is classified as "High" (Source: Lipper). "High" generally includes funds with VF that are higher than 12.185 but not more than 16.465. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
