LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
5	5	5	Lowest Highest
			① ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The month of May saw Malaysian equities underperforming regional markets, despite seeing some de-escalation in the US Tariff trade war. Malaysia's corporate results reporting season in May came in rather underwhelming with more companies disappointing or inline, and only a few surprising on the upside. Those that disappointed were in the telco, oil and gas, auto, gaming, healthcare and utilities sectors. Post the results reporting season, consensus has downgraded earnings from above 6% to below 3% for 2025. During the month, BNM maintained OPR at 3% but cut the Statutory Reserve Requirement from 2% to 1% releasing RM19b of liquidity into the banking system. BNM was clear to state that changes to the SRR is an instrument to manage liquidity and is not a signal on the stance of monetary policy.

The FBM Emas Shariah Index closed the month at 11,256.26, down 0.16% mom. The FBM Small Cap Shariah index rose 1.21% for the month, outperforming the FBM Emas Shariah Index. The best performing sectors were Telecommunication (+4.9%) and Consumer (+4.2%). The worst performing sectors were Oil & Gas (-9.2%) and Transport (-5.3%). Average value traded on Bursa in April was RM2405m lower by 15.9% mom.
