### LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key	
③	③	②	Lowest	①
			Highest	⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

### FUND MANAGER'S COMMENTARY

March was a positive month for bond markets as the JP Morgan Asia Credit Index and JP Morgan EMBI Global Diversified Index gained 1.06% and 2.09% respectively. Credit spreads continued to tighten while Treasury yields declined. US economic growth remained resilient with better than expected GDP data and expanding industrial activity.

As widely expected, the US Federal Reserve left the federal funds rate unchanged at a range of 5.25%-5.50% for the fifth consecutive meeting. Recent indicators suggest that the US economy was growing at a solid pace as GDP increased at an annualised rate of 3.4% in the fourth quarter of 2023, according to estimates from the Bureau of Economic Analysis. Meanwhile, manufacturing PMI from the Institute for Supply Management jumped 2.5 points to 50.3 in March. Over the month, yields on 5-year and 10-year US Treasury notes fell by 3 bps and 5 bps to 4.21% and 4.20% respectively.

High yield outperformed investment grade in the hard currency universe. Within the high yield sector in Asian credit, Pakistan sovereigns were the stand-out outperformer, as the IMF reached a staff-level agreement with authorities on the second review of Pakistan's stabilization program. Sri Lanka sovereign bonds also registered strong returns as the country made progress in talks with the IMF. Among emerging market debt, all regional mandates ended the month positively in March. Panama was downgraded by Fitch to speculative grade territory, while Zambia announced a deal with bondholders to restructure its debt.
