LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
④	④	④	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

Global equities gained in May, spurred by the 90-day pause in the tariffs imposed by the US and China. Information Technology and Communication Services contributed the most to market gains, while the Health Care sector detracted. The Bank of England (BoE) cut its policy rates by 25 bps to 4.25% to support the UK economy and trade. The annual inflation rate in the UK surged to 3.5% in April owing to the rise in housing and utilities prices. On the other hand, inflation fell to 2.3% in the US due to declining energy and food prices. European equities generated positive returns in May primarily due to the postponement of the 50% tariff on European Union (EU) imports by President Trump. Chinese equities also gained in May following the announcement of a 90-day suspension of tariffs by the US and China.

The Federal Reserve (Fed) held interest rates steady at the 4.25% to 4.50% range during its May meeting and currently anticipates the economy to grow at a modest pace, with inflation slightly above its 2% target. Unemployment rate in the US stood at 4.20% in May, remaining at the same level from the prior month. The US Treasury yields climbed as Moody's downgraded long-term issuer and senior unsecured ratings on US sovereign debt, citing the increase in national debt and high interest payment ratios. The yield on the 10-year Treasury note increased by 24 basis points to 4.40%, while the yield on the 2-year note rose by 29 basis points to 3.90%. Additionally, the US dollar continued its downward trend, influenced by slower US economic growth and fiscal deficit concerns.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 31 May 2025, the Volatility Factor (VF) for this Fund is 7.0 and is classified as "Low" (Source: Lipper). "Low" generally includes funds with VF that are higher than 4.715 but not more than 9.175. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
