Possible Outcomes of Investing in the Fund	
Investment involves risk and different types of unit trust funds carry different levels of risk. The value of the Fund and its distributions (if any) may rise or fall. These risk factors, among others, may cause you to lose some or all of your investment.	Refer to “Risk Factors” in the “Information In Relation to the Fund” section of the Fund’s Master Prospectus.
KEY RISKS	
<p>WHAT ARE THE KEY RISKS ASSOCIATED WITH THE FUND?</p>	Refer to “Risk Factors” in the “Information In Relation to the Fund” section of the Fund’s Master Prospectus.
Security risk	
Adverse price movements of a particular Shariah-compliant security invested by the Fund may adversely affect the Fund’s NAV.	
Credit or Default risk	
This risk refers to the inability of the issuer of the sukuk held by the Fund to make the profit or principal payments when due. In the event the issuer defaults in the profit or principal payments, the value of the Fund will be adversely affected.	

Interest rate risk
Generally, the value of sukuk will move inversely to interest rate movements. Therefore, the value of sukuk may fall when interest rates rise and vice versa. Sukuk of longer duration tend to be more sensitive to interest rate changes.
Shariah status reclassification risk
This risk refers to the risk that the currently held Shariah-compliant securities in the Fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the Securities Commission Malaysia or the Shariah Adviser.
