- Investors should note that the purchase of a unit in the Fund is not the same as placing funds on deposit with a bank or deposit-taking company. Although the Manager of the Fund may seek to maintain or preserve the principal value of the Fund, there can be no assurance that the Fund will be able to meet this objective. KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Refer to “Risks” of the Prospectus for further information on risks of the product.

Market and Credit Risks

- **You are exposed to credit risks.** The Fund invests in bonds and other fixed income securities which are subject to credit risks, such as risk of default by issuers
- **You are exposed to default risk.** The Fund will be exposed to the default risk of the financial institutions with which it places deposits and any default by such a financial institution on its obligations to make payments of interest and/or principal on deposits could result in substantial losses to the Fund.

Liquidity Risks

- **The Fund is not listed and you can realise your units only on Dealing Days.** There is no ready secondary market for the Fund. All realisation requests should be submitted in the manner set out in the Prospectus.
- **Your realisation request may be deferred or suspended.** Under certain circumstances (not limited to the liquidity of the underlying investments in the Fund) as detailed in the Singapore Prospectus, your realisation request may be deferred or suspended.

Product-Specific Risks

- **You are exposed to risk of historical pricing.** The units of the Fund are issued and realised on a historical pricing basis, such that units of the Fund issued and realised will generally be based on the NAV per unit at the close of business on the calendar day immediately preceding the date of issue or realisation of the units (or if such calendar day is not a Business Day, at 6 p.m. Singapore time on such day or such other time as may be determined by the Manager with the approval of the Trustee). As such the issue and realisation prices may not be reflective of the actual NAV of the units as at the date of issue or realisation.
- **You are exposed to the risk of early redemption charges on the Fund’s investments.** The Fund may be subject to early redemption charges on its investment in deposits particularly in the situation when the Fund faces a large redemption that may require the Fund to withdraw its deposits prematurely from the Eligible Financial Institutions.
