KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme constituted in Luxembourg that aims to generate returns in a well-diversified portfolio of stocks across market capitalisations, including medium sized and smaller companies, through a combination of capital appreciation and dividend income by investing primarily in equity and equity-related securities of companies, which are incorporated, listed in or have their area of primary activity, in India.
- You may receive distributions as declared by the Board of Directors on a monthly basis if you invest in a share class with a subscript DM in its name, on a quarterly basis on or around January, April, July and October if you invest in a share class with a subscript DQ in its name, on a semi-annual basis on or around April and October if you invest in a share class with a subscript DH in its name and on an annual basis on or around January if you invest in a share class with a subscript DY in its name. **Distributions are not guaranteed.** The Board of Directors may at its discretion pay distributions out of either (a) income; or (b) net capital gains; or (c) capital of the Sub-Fund or a combination of (a) and/or (b) and/or (c). Such distributions will reduce the net asset value (“NAV”) of the shares. The Board of Directors may also vary the frequency and/or amount of the distributions made.

Refer to “Basic Information”, “Investment Objectives, Focus and Approach” and “Dividend Policy” of the Singapore Prospectus for further information on features of the product.

¹ The Prospectus is available for collection at Eastspring Investments (Singapore) Limited, 10 Marina Boulevard #32-01 Marina Bay Financial Centre Tower 2 Singapore 018983, during business hours or accessible at www.eastspring.com.sg.

² Provided for available retail share classes inception before 31 December 2018. Please refer to the Prospectus for the specific expense ratio of such share class.

Investment Strategy

- Aside from the above equity investments, the Sub-Fund may also invest in depository receipts including ADRs and GDRs, debt securities convertible into common shares, preference shares, and warrants.
- The Sub-Fund aims at maintaining a well-diversified portfolio with flexibility to invest across sectors and market capitalisations and seeks to identify stocks that have high potential but are quoting at a discount to their fair/intrinsic value.
- The Sub-Fund follows the following blend of strategies for investing: Counter Cyclical Approach, Special Situations, Value Picks and Dividend Yield.
- The Sub-Fund follows a bottom-up approach at identifying undervalued companies currently out of favour, which have potential to realise value over time.
- An application may be made for the Sub-Fund to invest in equity and equity-related securities of companies, which are incorporated, listed in or have their area of primary activity, in India through the Foreign Portfolio Investors Regime (previously Foreign Institutional Investors Regime) administered by the Securities and Exchange Board of India.

Refer to “Investment Objectives, Focus and Approach” of the Singapore Prospectus for further information on the investment strategy of the product.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Refer to “Risks” of the Singapore Prospectus for further information on risks of the product.

Market and Credit Risks

- **You are exposed to portfolio risks of an equity fund and market risks in India.** The Sub-Fund is an equity fund and will be subject to risks such as fluctuations in market prices, adverse issuer or market information. The value of the Sub-Fund may also go up or down due to normal market fluctuations in the India market that the Sub-Fund invests in.
- **You are exposed to emerging markets risks.** The Sub-Fund invests in an emerging market which involves a greater risk of loss and is more volatile than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, volatility and regulatory risks.
- **You are exposed to currency risks.** As the Sub-Fund’s investments may be denominated in currencies that differ from the currency of the share class held by you, fluctuations in the exchange rates of these foreign currencies may affect the income and value of your shares. If you are invested in a share class that is not denominated in SGD and your reference currency is SGD, you may be exposed to additional exchange rate risks.
- **You are exposed to the risks of currency hedging transactions for a hedged share class.** The hedging strategy is to reduce but not eliminate currency risk. If these hedging transactions are imperfect or are only placed over a portion of the foreign exchange exposure, such share class will bear the resulting benefit or loss. It is important to note that currency hedging transactions for one share class may in extreme cases adversely affect the NAV of the other share classes within the Sub-Fund.
- **You are exposed to counterparty risks.** The Sub-Fund will be exposed to the credit risk on counterparties with which it trades and any default by such a counterparty (for example, due to insolvency) could result in substantial losses to the Sub-Fund.
- **You are exposed to liquidity risks of the Sub-Fund’s investments.** The Sub-Fund may have investments which have high liquidity risks (for example, low trading volumes) and may incur substantial losses if it is unable to sell these investments at opportune times or prices.

Liquidity Risks

- **The Sub-Fund is not listed and you can redeem your shares only on Business Days.** There is no ready secondary market for the Sub-Fund. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **Your redemption request may be deferred or suspended.** There may be a 10% limit on the number of shares that can be redeemed and converted on a Valuation Day. Therefore, your redemption request may be deferred to the next Valuation Day (which is subject to the same limit) if redemptions exceed the limit on that day. Your right to redeem shares may also be temporarily suspended under certain circumstances as described in the Singapore Prospectus.

Product-Specific Risks

- **You are exposed to country risks.** As the Sub-Fund invests in a single country (i.e. India), it is exposed to the market, currency and other risks related specifically to the economy of that country. In addition, if an application is made for the Sub-Fund to make investments in India under the Foreign Portfolio Investors Regime, such investments will be subject to the restrictions and risks under the Foreign Portfolio Investors Regime.
- **You are exposed to derivatives risks.** The Sub-Fund may use derivative instruments, such as options, swaps, forward contracts and futures contracts, for efficient portfolio management and/or hedging purposes. Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk.
- **You are exposed to concentration risks.** Investors should note that the net asset value ("NAV") of this sub-fund is likely to have higher volatility due to its concentration of investment in a single country.
