#### PRODUCT SUITABILITY

##### WHO IS THE PRODUCT SUITABLE FOR?

The Fund is only suitable for investors who:

- seek to maximise long-term total return;
- are comfortable with the risk of a fund investing in bonds which are primarily denominated in Singapore Dollars; and
- appreciate that their capital will be at risk and that the value of their investment and any derived income may fall as well as rise.

**Investors should consult their financial advisers if in doubt whether this product is suitable for them.**

##### *Further Information*

*Refer to “Product Suitability” of the Prospectus for further information on product suitability.*

#### KEY PRODUCT FEATURES

##### WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore that aims to maximise total returns over time by investing primarily in Singapore-dollar denominated debt securities and foreign currency debt securities which will be hedged backed into Singapore dollars.
- You may receive quarterly distributions if you invest in Class A<sub>D</sub>. The Manager will decide whether distributions will be made based on, amongst other factors, prevailing market conditions and income from underlying investments. **Distributions are not guaranteed.** Distribution payments shall, at the sole discretion of the Manager, be made out of either (a) income; or (b) net capital gains; or (c) capital of the Fund or a combination of (a) and/or (b) and/or (c). The Manager may also vary the frequency and/or amount of the distributions made. Any payment of distributions by the Fund will result in an immediate decrease in the NAV per unit.

*Refer to “Basic Information” and “Structure, Investment Objective, Focus and Approach” of the Prospectus for further information on features of the product*

<sup>1</sup> The Prospectus is available for collection at Eastspring Investments (Singapore) Limited, 7 Straits View #09-01, Marina One East Tower, Singapore 018936, during business hours or accessible at [www.eastspring.com/sg](http://www.eastspring.com/sg).

### Investment Strategy

- The Fund will invest primarily in Singapore-dollar denominated debt securities, including the Singapore government securities, investment grade and/or unrated debt securities issued by Singapore statutory boards and Singapore-incorporated entities as well as investment grade debt securities issued by entities outside Singapore.
- The Fund may also invest up to 30% of its assets in foreign currency-denominated debt securities issued by the above entities (hedged back into Singapore dollars). Additionally, the Fund may employ derivatives for hedging or efficient portfolio management purposes.
- The Manager uses a “top-down” approach through economic and market analysis to establish the Fund’s duration, yield curve and credit strategies.
- This is complemented with a “bottom-up” credit selection, which involves the research and analysis of bond issuers, to identify good value opportunities and to manage credit risks.

*Refer to “Structure, Investment Objective, Focus and Approach” of the Prospectus for further information on the investment strategy of the product.*

- The Trustee is HSBC Institutional Trust Services (Singapore) Limited
- The Custodian is The Hongkong and Shanghai Banking Corporation Limited

### KEY RISKS

#### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

**The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:**

*Refer to “Risks” of the Prospectus for further information on risks of the product.*

#### Market and Credit Risks

- **You are exposed to interest rate and credit risks.** The Fund invests in bonds which are subject to interest rate fluctuations and credit risks, such as risk of default by issuers.
- **You are exposed to counterparty risks.** The Fund will be exposed to the credit risk on counterparties with which it trades and any default by such a counterparty could result in substantial losses to the Fund.

#### Liquidity Risks

- **The Fund is not listed and you can realise your units only on Business Days.** There is no ready secondary market for the Fund. All realisation requests should be submitted in the manner set out in the Prospectus.
- **You are exposed to liquidity risks of the Fund’s investments and your realisation request may be deferred or suspended.** The Fund may have investments which have high liquidity risks (for example, low trading volumes) and may incur substantial losses if it is unable to sell these investments at opportune times or prices. Under certain circumstances (not limited to the liquidity of the underlying investments in the Fund) as detailed in the Prospectus, your realisation request may be deferred or suspended.

### Product-Specific Risks

- **You are exposed to derivatives risks.** The Fund may use derivative instruments for efficient portfolio management and/or hedging purposes. Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk.
- **You are exposed to concentration risks.** The Fund may primarily invest in a limited number of countries which will carry a higher concentration risk than a diversified fund.
- **You are exposed to the risk of distributions out of capital. Distributions for Class AD may be sourced from capital from time to time.** Such capital distributions represent a return or withdrawal of part of the amount the investors originally invested and/or capital gains attributable to the original investment and will result in a reduction in the NAV of the relevant Class and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained as a result.
