Investment objective

The Sub-Fund aims to provide income and modest capital growth over the medium to long term through the implementation of an actively managed investment strategy. This strategy combines both discretionary and rules-based approaches, allowing flexibility in response to changing market conditions. The Sub-Fund invests in a diversified range of eligible global assets including but not limited to equities (and equity-related securities), fixed income/debt securities, currencies and cash and its equivalents. Exposure to the asset classes will be primarily through: direct equity and fixed income/debt securities (including sovereign debt, high yield securities, CMBS, ABS, MBS and convertible bonds), units of undertakings for collective investment, exchange traded funds, money market instruments and FDI (such as forwards, futures, options, swaps, swaptions, credit default swaps and total return swaps). The Sub-Fund may use FDI for hedging and for the purposes of efficient portfolio management through recognised exchanges or via the over-the-counter markets. Over-the-counter FDI may be used to implement strategies by providing exposure to baskets of UCITS eligible instruments. The Sub-Fund may also invest up to 10% in aggregate of its net assets in Alternative Asset Classes. The Sub-Fund may also invest up to 5% in aggregate of its net assets in Distressed Securities and Defaulted Securities and up to 5% of its net assets may be invested in Contingent Convertible Bonds ("CoCos"). Investors are strongly advised to refer to the SICAV Prospectus for further details on the investment objectives.
