WHO IS THE PRODUCT SUITABLE FOR?

- The Sub-Fund is only suitable for investors who:
  - seek long term total return;
  - are comfortable with the risks and greater volatility of an equity fund that invests in a single emerging market; and
  - appreciate that their capital will be at risk and that the value of their investment and any derived income may fall as well as rise.
- Investment in a hedged share class is suitable for investors who already have exposure to, or have all or part of their deposits, assets and liabilities denominated in, the reference currency of the hedged share class.

You should consult your financial advisers if in doubt whether this product is suitable for you.

Further Information

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a collective investment scheme constituted in Luxembourg that aims to maximise long-term total return by investing primarily in equity and equity-related securities of companies, which are incorporated, listed in or have their area of primary activity, in Philippines.
- You may receive distributions as declared by the Board of Directors if you invest in a distributing share class. **Distributions are not guaranteed.** The Board of Directors may at its discretion pay distributions out of either (a) income; or (b) net capital gains; or (c) capital of the Sub-Fund or a combination of (a) and/or (b) and/or (c). Such distributions will reduce the net asset value ("NAV") of the shares. The Board of Directors may also vary the frequency and/or amount of the distributions made.

Refer to "Basic Information", "Investment Objectives, Focus and Approach" and "Dividend Policy" of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- Aside from the above equity investments, the Sub-Fund may also invest in depositary receipts including ADRs and GDRs, debt securities convertible into common shares, preference shares, and warrants.
- The investment process is a bottom-up valuation driven approach supplemented by the Investment Manager's deep knowledge of structural themes and is split into four stages which are idea generation, fundamental analysis, portfolio construction and risk control and review.
- You should note that the net asset value of this Sub-Fund is likely to have higher volatility due to its concentration of investment in a single country.

Refer to "Investment Objectives, Focus and Approach" of the Singapore Prospectus for further information on the investment strategy of the product.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of the product and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:

Refer to "Risks" of the Singapore Prospectus for further information on risks of the product.

Market and Credit Risks

- **You are exposed to equity risks.** The Sub-Fund may invest in equities and will be subject to risks such as fluctuations in market prices.
- **You are exposed to currency risks.** Share classes which are not expressed in the Sub-Fund's base currency are subject to exchange rate fluctuations between the relevant share class and the Sub-Fund's base currency. Hedging (for a hedged share class) will not eliminate all the risk of loss due to currency fluctuations.
- **You are exposed to counterparty risks.** The Sub-Fund will be exposed to the credit risk on counterparties with which it trades and any default by such counterparty could result in substantial losses to the Sub-Fund.

Liquidity Risks

- **The Sub-Fund is not listed and you can redeem your shares only on Business Days.** There is no ready secondary market for the Sub-Fund. All redemption requests should be submitted in the manner set out in the Singapore Prospectus.
- **You are exposed to liquidity risks of the Sub-Fund's investments and your redemption request may be deferred or suspended.** The Sub-Fund may have investments which have high liquidity risks (for example, low trading volumes) and may incur substantial losses if it is unable to sell these investments at opportune times or prices. Under certain circumstances (not limited to the liquidity of the underlying investments in the Sub-Fund) as detailed in the Singapore Prospectus, your redemption request may be deferred or suspended.

Product-Specific Risks

- **You are exposed to country risks.** As the Sub-Fund invests in a single country, it is exposed to the market, currency, political, regulatory and other risks related to the economy of that country. Investors should also note that the NAV of this sub-fund is likely to have higher volatility due to its concentration of investment in a single country.

- **You are exposed to derivatives risks.** The Sub-Fund may use derivative instruments for efficient portfolio management and/or hedging purposes. Derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk, operational risk and leverage risk.
- **You are exposed to emerging markets risks.** The Sub-Fund may invest in emerging markets which generally carry greater political, legal, tax, and regulatory risks than more developed markets.
- **You are exposed to securities lending risks.** The Sub-Fund may enter into securities lending transactions, which exposes the Sub-Fund to certain operational, liquidity, counterparty, custody and legal risks.

- You will normally receive the redemption proceeds within ten Business Days (or if any Business Day within such period is not a Valuation Day, such period as extended accordingly) following the Singapore Representative's receipt of the redemption request, subject to it being in order.
- The redemption proceeds that you will receive will be the redemption price multiplied by the number of shares redeemed, less any charge. There is currently no redemption charge applied to redemptions. An example is as follows:
