Further Information

Refer to "Product Suitability" of the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore that aims to provide a higher total return (the combination of capital growth and income) than that of the MSCI ACWI Index over any five-year period.

Refer to "Basic Information" and "Structure, Investment Objective, Focus and Approach" of the Prospectus for further information on features of the product.

Investment Strategy

- The Manager intends to achieve the above investment objective by investing all or substantially all of the assets of the Fund into the United Kingdom domiciled M&G Investment Funds (1) – M&G Global Themes Fund (the "underlying fund") which shares the same investment objective.
- The underlying fund will invest at least 80% of its net asset value in the equity securities of companies across any sectors and market capitalisations that are domiciled in any country, including emerging markets. The underlying may also invest in collective investment schemes, other transferable securities and may hold cash for liquidity purposes.

Refer to "Structure, Investment Objective, Focus and Approach" of the Prospectus for further information on the investment strategy of the product.

¹ The Prospectus is available for collection at Eastspring Investments (Singapore) Limited, 10 Marina Boulevard #32-01 Marina Bay Financial Centre Tower 2 Singapore 018983, during business hours or accessible at www.eastspring.com.sg.

- The underlying fund combines top-down and bottom-up analysis. The Investment Manager of the underlying fund aims to identify themes arising from long-term structural shifts, changes or trends. Stocks that can benefit from these themes are then selected on the basis of their quality, growth and valuation. Themes are identified through a top-down analysis of global macroeconomics, demographics, government policies and spending, and technological innovation, among other considerations.
- The bottom-up stock selection process is designed to identify well-run companies which can benefit from those themes and which are trading on attractive valuations with good, sustainable growth prospects.
- The underlying fund is invested across the market-cap spectrum and is geographically diversified.

Product-Specific Risks

- **You are exposed to emerging markets risks.** The underlying fund invests in emerging markets which generally carry greater political, legal, tax and regulatory risks than more developed markets.
- **You are exposed to derivatives risks.** The Fund and/or the underlying fund may use derivative instruments for efficient portfolio management and/or hedging purposes.
